Research Degrees—The undermentioned scholars were admitted to the various Research Degrees on the recommendation of the Examiners of their theses as mentioned against each:

D.Sc.

Name of the candidate	Title of the Thesis
Sri Anil K. Bhattacharyya	... Studies on the Active Principles of <i>Kopsia Fruticosa</i> <i>Kopsia Albiflora</i> and <i>Skimmia Laureola</i> .
Sri Dineschandra Biswas	... Investigations on the Raman Spectra and Fluorescence spectra of Organic Compounds.
Sri Bhupatikumar Banerjee	... Studies on Glass.

M.D. Examination, 1957

Name of the candidate	Title of the Thesis
Sri Dwijendrakumar Bagchi	... Clinical haematological, bio-chemical and electro-cardiographic observations in recomplicated cases of cholera and in post choleraic uraemia.
Sri Chittaranjan Maiti	... The Heart in chronic pulmonary emphysema.

M.S. Examination, 1957

Name of the candidate	Title of the Thesis
Sri Udaysankar Arora	... Preliminary studies on chronic Filarial Lymphoedema.
Shaukh Ali Ashraf	... Resectional Surgery in the treatment of pulmonary tuberculosis—a study of 50 cases.
Sri Sarojbhushan Basu	... Histo-Chemical detection of alkaline & acid phosphatase activity in normal and pathological prostates as an aid in the diagnosis.

M.O. Examination, 1957

Name of the candidate	Title of the Thesis
Sri Narayan Chaudhuri	... Study of Homeostasis and Adreno cortical function in Pregnancy and Labour.
Sri Bhabeshchandra Lahiri	... Study on intravenous infusion of Oxytoein (pitocin) for induction of Labour.
Sri Nagendranath Raychaudhuri	... Study of the effects of Toxaemiae of pregnancy on new born babies.
Sri Pradyotkumar Khan	... A study of forceps delivery and its scope in Midwifery (A review of 1230 cases).

D.Phil. (Science)

Name of the candidate	Title of the Thesis
Sri Suratkumar Mukherjee	... Studies in Experimental Diabetes.
Sri Bidyutbaran Nath	... Studies on blood Coagulation by various methods including ion exchange and with particular relation to the role of Calcium ion.
Sri. Maya Guha	... Construction and Standardisation of an Engineering (Mechanical & Electrical) aptitude test.
Sri Rabindranath Ray	... Investigation on the Ionosphere.
Sri Dilipkumar Ghosh	... Investigation on the absorption of ultra high frequency radio waves and Micro waves in polar liquids.
Sri Santoshkumar Sarkar	... Cytogenetics of some Augrosparmonas families and an investigation on the effect of Chemicals on Chromosomes

Name of the candidate	Title of the Thesis
Sri Sudhirranjan Chaudhuri	Investigations on the role of essential fatty acids in <i>Phrynoderm</i> .
Sri Mihirkumar Raychaudhuri	Mineral resources of Madhya Bharat with contributions to Geology of the State.
Sri Satischandra Saxena Sri N. L. Sitaraman	Transport properties of gases. A study of the Anophelisine Mosquitoes of some parts of South India, their role in Malaria transmission and behaviour towards residual insecticides.
Sri Bimalkrishna Bhattacharyya	(1) Transient response of pulse Amplifiers and (2) Problems of Electromagnetic Induction and Propagation below the surface of the earth.
Sri Kumarkrishna Chatterjee	Absorption Spectors and bond Character of metal chelates, etc.
Sm. Sovana Dhar	Development and studies on energy response and resolutions Scintillation Counters and their application in measurements of Alpha activity and in gama ray spectroscopy.
Sri Kantipada Chatterjee	Studies on certain aspects of protein Nutrition.
Sri Gorachand Chatterjee	Studies on the roll of lipids in the Coagulation blood.
Sri Arunkumar Saha	Some general and special features of the Consperic Regions.
Sri Sasankabhusan Banerjee	Studies on some physical properties of Jute fiber in relation to technology.
Sri Usharanjan Ghatak	Synthesis of alicyclic compounds related to natural products.
Sri Tapadhan Ganguli	Group participation as an effective technic for improving altitude and morale in industrial workers.
Sri Nakhilranjan Ghosh	A study on Alicyclic compounds.
Sm. Anjali Sarkar	Investigations on <i>Gamaderma Lucidum</i> Karst.
Sri Brojendralal Banerjee	Studies on Mechanical Behaviours of some Cellulose Fibers including Jute.
Sri Tarinichandra Bhadra	On the production and absorption of ultra-sonic radiation in liquid media.
Sri Dharendralal Nandi	On the free Amino-acids, related products and some B vitamin contents of a few leguminous seeds during germination.
Sri Sarojkumar Basu	Ion exchange studies with the help of membrane electrodes.
Sri Kalyanmoy Sen	Studies on Carbo Cyclic Compounds.
Sm. Usha Rakshit	Synthesis of Alicyclic compounds.
Sri Amalkumar Ray	Studies on the Mechanism of Action of Vitamin A with special reference to Hyper Vitaminosis A in the body.
Sri V. A. Moghe	Studies in solubilization of water in non-polar solvents by Calionic detergents.

Name of the candidate	Title of the Thesis
Sri Birendrabijay Biswas	A cytochemical and bio-chemical study on Cyanaphycoal with special reference to nucleic acids.
Sri Kartickchandra Ray	Studies on Coagulation and electro-kinetic potential of Colloids.
Sri Sachindra Kumar Majumdar	Action on some common bleaching agents and Alkalies on Jute.
Sm. Roma Ghosh	Studies on the Chemical constituents of <i>Alstonia Scholaris</i> .
Mr. J. Xavier	Applications of co-ordination complexes of Organic Theocompound in Analytical Chemistry.
Sri Madho Govind Srivastava	Cytological and Cytotaxonomical Studies in Leguminosae.
Sri Ajitkumar Ghosh	Studies on the electro Kinetic potential of Colloids and pyrex glass.
Sri Ajitkumar Saha	Structural and Petrological studies on the diorites and associated rocks in Eastern Singhbhum and Mayurbhanj.
Sri Paritoshkumar De	Studies on stability and Electro-Kinetic potential of Colloids.
Sri Bireswar Banerjee	Studies on Co-ordination complexes with Organic Ligands.
Sri Dipakumar Ray	Studies on aspects of Nuclear Magnetic Resonance Phenomena.
Sri Susantakumar Chatterjee	Studies on the hydrolic and related properties of Blast Furnace slag available in India.
Sri Dhurjatiprasad Chattopadhyay	Role of liver in the synthesis of meicotinic acid from tryptophan.
Sri Ramgobinda Chatterjee	An experimental study on the nature of time gap phenomenon in the estimation of short duration in two sense modalities.

D.Phil. (Arts)

Name of the candidate	Title of the Thesis
Sri Bimanchandra Bhattacharyya	Rigveda mantras—their original purpose and later application.
Sri Satyendranath Ghoshal	A Literary and Linguistic study of Muslim contributions to Bengali Literature (17th Century).
Sri Arunkumar Mukherjee	Unabinsa Sataker Bangla Gitikavya.

A sum of Rs. 1,00,000 was received from the University Grants Commission for construction of P.-G. Hostels.

A sum of Rs. 30,000 was received from the University Grants Commission for Library books on Humanities.

Equivalence of Examination—During the period under review the following examinations of other Universities and Boards were recognised as equivalent to the corresponding examinations of this University :

Name of University or Board	Name of Examination	Equivalent to the Examinations of this University
University of Rajasthan	B.Com.	B.Com.
Madras University ...	Pre-University Course	Completion of First-year Intermediate course.
Rajshahi University ...	M.A. in English, History, Economics, Philosophy, Bengali, Islamic History and Culture, Geography, Mathematics; M.Sc. in Geography and Mathematics.	Corresponding examinations of this University.
Poona University ...	I.Sc.(Ag.)	I.Sc.(Ag.)
Vidarbha Board of Secondary Education, Nagpur.	Secondary School Certificate Examination.	School Final Examination of the Board of Secondary Education, West Bengal.
Mahakosal Board of Secondary Education, Jabalpur.	Do.	School Final Examination of the Board of Secondary Education, West Bengal.
Visva-Bharati University.	School Certificate Examination.	School Final Examination of the Board of Secondary Education, West Bengal.
Dacca University	M.B.B.S.	M.B.B.S
Punjab University	B.Sc. Engineering (Civil)	B.E. for the purpose of admission to the M.E (P.H.) Course
U. P. Board	I.Sc.(Ag.)	I.Sc.(Ag.)

Important Decisions—The following recommendations were made for erection of a suitable memorial to the late Dr. Harendra Coomar Mookerjee, the great benefactor of the University:

(1) That a Chair be named after late Dr. Harendra Coomar Mookerjee.

(2) That a suitable memorial be erected and that the Registrar be authorised to make an appeal to the general public for contribution to the Fund for the erection of the memorial.

(3) That a memorial volume be published half of which will contain the articles written by late Dr. H. C. Mookerjee and the other half will contain suitable articles written by others and that, for this purpose, the following Board of Editors be constituted:—

Prof. P. N. Banerjee, Editor-in-Chief

Sri Hemendraprasad Ghosh

Sri Chapalakanta Bhattacharyya

The name of the ‘ Institute of Nuclear Physics ’ was changed to ‘ Saha Institute of Nuclear Physics.’

An Additional Dearness Allowance at Rs. 5 p.m. was ordered to be paid to all the employees of the University drawing pay not exceeding Rs. 250 p.m. with effect from June, 1957.

The Annual Report was ordered to be circulated to the Syndicate before the 30th September, each year.

Changes in the Regulations were ordered not to be printed in the Annual Report but only references to the changes together with the dates of their effect were to be given.

The amendments to the Provident Fund rules of the University Employees including Teachers in respect of payment of Additional retirement benefit were accepted.

A sum of Rs. 400 in addition to the original grant of Rs. 600 was sanctioned for Sree Sarada Ashram.

House rent allowance according to the rules and rates of the Government of West Bengal was sanctioned for the teachers and Officers of the University.

AFFILIATED COLLEGES

During the period under review there were 135 colleges—Arts and Science—111, Medical—9, Commerce—1, Agriculture—1, Tanning—1, Law—2, Engineering—1, Training—5, Music—2, Textile—1 and Home and Social Sciences—1.

FINANCIAL POSITION

The Budget Estimates for the year 1957-58 showing a deficit of Rs. 8.38 lakhs were passed by the Senate on 25th June, 1957. The year opened with a surplus balance of Rs. 2.93 lakhs and it was estimated that the actual deficit at the close of the year 1957-58 would come to Rs. 6.35 lakhs.

As per award of the Tribunal constituted under the Secondary Education Act, 1950, a sum of Rs. 5.52 lakhs per annum is payable by the Government of West Bengal to compensate the loss incurred by the University on account of Matriculation Examination. This amount as well as the statutory grant of 16 lakhs has been received from the Government of West Bengal.

It is now anticipated according to the revised estimates for 1957-58 that the position at the close of the year will be more or less like—

	Rs.
Estimated deficit as per Budget Estimates of the year, 1956-57	6.35 lakhs
Less receipt in excess of the Budget estimates minus amount transferred to Reserve Fund and additional expenditure sanctioned 8.38
Total deficit	... 2.93

This deficit is likely to be wiped out as substantial saving is expected.

This year we received from the Reserve Bank of India a sum of Rs. 15,548 for maintenance of the Professorship on Industrial Finance with two Research Assistants working under him. The scheme has been extended for another term of 5 years.

There is a proposal for strengthening the Department of Economics with an estimated non-recurring expenditure of Rs. 9,00,000 inclusive of Rs. 3,00,000 for land. The total recurring expenditure after expansion is estimated to be Rs. 1,80,000. The University or the State Government are to meet 50% of the additional recurring expenditure and the University Grants Commission has been requested to meet the balance. The University Grants Commission has already made available Rs. 2,00,000 to the University towards non-recurring grant. The Building is already complete. The Department will start functioning there very soon.

The University celebrated its Centenary Celebration in January, 1957. The University Grants Commission has agreed to pay rupees one crore being the contribution of the Central Government to the University on the occasion of Centenary Celebration. Out of this commitment we have received Rs. 37.75 lakhs so far, Rs. 28.30 lakhs being received during the year under review. The Government of West Bengal, on the occasion of Centenary Celebration, has converted the loans given to University from time to time, into grants and thus no repayment will be required of the outstanding of loan and interest of Rs. 7,78,358.12-0. Also we have received Rs. 2.87 lakhs from private sources as Centenary contribution.

A new Professorship in Chemical Physics has been created under the Department of Pure Physics. The Government of West Bengal have sanctioned Rs. 7,950 representing 50% of recurring expenditure for this post. The University Grants Commission has been requested to bear balance 50% of the recurring cost.

The University has adopted without modification the Dearness Allowance rules of the Government of West Bengal with effect from 1st July, 1956. Accordingly all categories of whole-time University employees including Officers and Teachers are being paid Dearness Allowance at rates admissible according to West Bengal Government rules. In respect of applicability and rates previous Dearness Allowance rules of the University were different from West Bengal Government.

The Senate on 27th June, 1958, adopted following measures for the welfare of University employees and pensioners.

- (i) Compensatory House Rent at West Bengal Government rules as amended from time to time has been sanctioned to all wholetime employees of University including Teachers, Demonstrators, Research Assistants and Officers with effect from 1st June, 1958. Under the existing rules office Assistants, Technical hands and members of the Lower Subordinate staff are drawing a salary not exceeding Rs. 330 p.m. get this benefit.
- (ii) Except in cases of certain categories of staff appointed before 1st June, 1938, the rate of University contribution for Provident Fund has been so long 6½%. This has been raised to 8½% with effect from 1st June, 1958.
- (iii) The monthly pensions of all categories of pensioners has been raised by 25%.

The University Grants Commission pays to the University a recurring grant of Rs. 2.19 lakhs for the expansion scheme of the three Technology Departments of Applied Physics, Applied Chemistry and Radiophysics and Electronics. For equipment and buildings the University Grants Commission has further approved a scheme of Rs. 21.55 lakhs for these three Departments out of which the Grants Commission share will be Rs. 14,37,196 and the balance is to be paid by the State Government or the University. The University received a sum of Rs. 6,25,000 for this purpose in the previous year, out of which a sum of Rs. 65,333 has been, during the year under review, diverted to other schemes by the Grants Commission. The University Grants Commission has further approved a recurring grant of Rs. 1,52.771 for these Departments out of which 50% will have to be shared by the State Government or the University. For development of Advanced Electronics Course University receives a recurring grant of Rs. 30,666 from the University Grants Commission and Rs. 14,000 from the Government of West Bengal.

As in previous years the Government of West Bengal sanctioned Rs. 50,000 for distribution to the selected colleges of West Bengal for purchasing books which has been accordingly done.

Two hostels for Post-Graduate students, one for male students and another for women candidates are under construction. The total estimate for these hostels is Rs. 9,24,000. The Government of India has agreed to grant Rs. 4,60,000 for these hostels. The University has so far received

Rs. 3,54,669 from the University Grants Commission out of which Rs. 1,00,000 has been received during the year under review. From the Government of West Bengal we have received Rs. 4,28,135 for this purpose, out of which Rs. 31,185 has been given as interest-free loan and the balance in the form of land for hostel. The loan has however been converted into grant by the Government of West Bengal and hence no repayment will be required.

The construction of the building for the V. L. College of Home and Social Science at Hastings is partially complete. The college is already functioning in the new building. It is now estimated that a sum of Rs. 11.54 lakhs will be required which includes cost of land and construction of building and equipments. The land at Hastings has been purchased at a cost of Rs. 3,00,000 from the State Government by selling the corpus of the V. L. Mitra Fund to the extent of Rs. 3.73,000 out of the total corpus of Rs. 6,56,700.

The Government of India have agreed to bear 66% of the actual cost of the buildings, which is estimated as Rs. 5.89 lakhs. The University has so far received Rs. 1,50,000 from the Central Government towards the construction of building and a recurring grant of Rs. 15,000 for the period up to February, 1958. The Government of West Bengal sanctioned an *ad hoc* grant of Rs. 46,160 in the previous year for this college.

UNIVERSITY COLLEGE OF LAW

During the period under review, i.e., 1957-58, there was an increase in the roll strength of the college in comparison with that of the previous year. In 1957-58, the number of students on the rolls of the college was 2,343 while in the previous session it was 2,023. The tutorial staff consisted of thirty-four Lecturers.

The Library Reading Room remained open from 6-30 A.M. to 8 P.M. on all working days except on Saturdays when it closed at 5 P.M. The total number of books issued to the students in the Reference and the Lending sections was 37,586.

During the year under review the College Union, the College Athletic Club and the College Gymnasium gave a good account of their respective activities. This college won trophy in the Inter-collegiate Debate Competition held in Maldah. In the Inter-collegiate Cricket Competition the College Team became champion.

Attached to the college is the Hardinge Hostel which has accommodation for about 160 boarders.

UNIVERSITY COLLEGE OF MEDICINE

During the period under review the activities of the University College of Medicine were mainly concerned with organisational work and conduct of a course of higher training in Basic Medical Sciences (Anatomy, Physiology, Biophysics and Biochemistry, Pharmacology, Pathology, Bacteriology and Medical Zoology and Experimental Surgery) and Post-Graduate Lecture Course for the students intending to qualify themselves for the Degrees of Doctor of Medicine, Master of Surgery and Master of Obstetrics.

The inauguration of the Basic Medical Sciences Course took place at Darbhanga Hall, Darbhanga Building on 5th November, 1957 at 6 p.m. Dr. B. C. Roy, Chief Minister of West Bengal, inaugurated this course. Dr. Roy opined that Basic Medical Sciences Course is necessary in the interest of the science of medicine. Dr. S. Mitra, Vice-President, Council of the University College of Medicine explained the objects of the Basic Medical Sciences Course. Sri N. K. Sidhanta, Vice-Chancellor and President of the Council of the University College of Medicine presided over the function. He mentioned about the importance of Basic Medical Sciences for the advancement of Medical Sciences.

In the inaugural function the Vice-Chancellor announced the offer of an endowment by the sons of late Dr. B. N. Ghosh for an award of a medal to the best student in the Basic Medical Sciences Course of the University College of Medicine in memory of the late Doctor.

Dr. A. Lakshmanswami Mudaliar, Vice-Chancellor, University of Madras, who visited the University on invitation expressed his appreciation for starting the University College of Medicine for Post-Graduate Teaching and for making provision for research courses under the guidance of able and eminent teachers.

The organisational work was mainly conducted through the Central Office of the University College of Medicine situated at Darbhanga Building. A meeting of the teachers in different subjects was held where details regarding dates, time and subject matter of individual lecturers were discussed and finally approved.

A detailed programme of teaching of different subjects containing dates, time, venue, teacher and subject matter of individual lecture was printed by the Central Office and circulated to the students and teachers before the course actually began.

Distribution of Students—No. of students admitted in the Basic Medical Sciences Course for the year 1957-58—30, Post-Graduate Lecture Course in Medicine for the year 1957-58—33, Post-Graduate Lecture Course in Obstetrics & Gynæcology for the year 1957-58—22, Post-Graduate Lecture Course in Surgery for the year 1957-58—21. The students took a keen and lively interest in the Basic Medical Sciences Course and Post-Graduate Lecture Courses in Medicine, Obstetrics & Gynæcology and Surgery. The students for the clinical lecture courses were very eager to have more lectures. During the later parts of the Basic Medical Sciences Course the attendance become thinner as some of them were absorbed in teaching posts, some of them were appointed in Government jobs, some of them sailed for England for appearing in F.R.C.S. and M.R.C.P. Examinations etc. and some of them had employments elsewhere which prevented them from attending all the classes.

Research—Following Research Scholars are working in different Departments of the University College of Medicine, Calcutta University.

ASUTOSH MUSEUM OF INDIAN ART

Through rapid accession of objects, mainly from exploration, the Asutosh Museum of Indian Art, has during the last few years been overcrowded. Now the saturation point has finally been reached. There is scarcely any space of storing even and consequently rare stone images are lying scattered on the floor here and there, and thousands of ancient terra-cotta figures are lying piled up in cases denied any means or possibility of display.

Exploration—The archaeological investigations carried in the period 1957-58 have not only been rewarded by discovery of antiquities belonging to Mauryya, Sunga, Kushan and Gupta periods from the ancient sites of Chandraketugarh, Atghara and Harinarayanpur near Calcutta but also by several pre-historic seals from the first two places. The existence of a prehistoric

civilisation in lower Bengal analogous to the Indus valley culture is suggested for the first time by discovery of a type of pottery called black-and red ware, associated with Chalcolithic culture, from the aforesaid sites.

During the year under review, the Museum has been greatly enriched by explorations by about two thousand antiquities majority of them terra-cotta seals, plaques and some significant black and red wares of proto-historic age collected from the sites of Chandraketugarh, Harinarayanpur and Atghara discovered in the vicinity of Calcutta, by a team of workers consisting of Sri P. C. Dasgupta, Sri M. K. Pal, Sri C. R. Raychaudhuri, Dr. K. Ganguli, Sri Satyen Ray, Sri P. Shome, Sri K. C. Sarkar and Sri S. Majumdar.

Of all the relics two terra-cotta tablets of proto-historic lineage also having remote resemblance with Harappan culture open up a new vista in Eastern Indian culture specially of the lower Ganga valley which up till now only yielded Mauryya and Post-Mauryya relics. Sri P. Shome has collected from Chandraketugarh one eye-shaped seal consisting of figures, shaven headed, hook-nosed and lower portion covered by kilted drapery strangely Sumerian and Harappan in Character. The other one secured by Sri P. C. Dasgupta from Harinarayanpur shows a round tablet containing two striking abstract figures in relief confronting each other. Both of them are beak headed and crowned with twigs like some of the Harappan seal types the larger one bestowing a staff like thing to the smaller one opposite, obviously appears to be a divinity.

What happens to be earliest Buddha figure, so far discovered in Bengal, has recently been collected by Sri S. Roy from Khana-Mihirer Dhipi in the environs of Chandraketugarh where archaeological excavations have also been undertaken this year under the auspices of the Asutosh Museum. Representing a small fragment in red sand-stone, the torso of Buddha is reminiscent in almost every detail of the earliest seated Buddha of the Mathura school of about the 1st century A.D. Sri D. P. Ghosh collected from Chandraketugarh, a headless terra-cotta figure, probably a royal warrior of remarkable vigour which may also be assigned to the Kushan era. Other notable finds from the same site include a terra-cotta torso of a lady attired in foreign mode with tunic and cap, a series of Mithuna plaques of the widest variety, some of them definitely Sunga as revealed by the architectural setting having stylistic affinity with the early Andhra school of the Deccan in dynamic movement and slender grace, unique winged terra-cotta elephants holding lotus stalks in their trunks possibly of Mauryya workmanship, bold and vigorous ram's head with a beautiful slip, seals and polished stone fragments inscribed in early Brahmi characters, a small

terra-cotta tablet of Sunga origin showing a royal couple on a comparisoned elephant led by a Mahout, perhaps representing the story of Udayana and Vasabadatta, exquisite yaksa, yakshini heads and innumerable early coins, beads and other antiquities.

Besides several terra-cotta seals with proto-historic designs, explorations at Harinarayanpur have yielded a pair of terra-cotta fragments of lower parts of females with splayed out hips of pre-Mauryya origin, another fragment of a sensitively modelled yakshini plaque with diaphanous drapery, terra-cotta sprinkler of probable Roman origin, punch-marked and cast-coins—one with a curious device of a caparisoned horse on the obverse and an elephant entering a Torana on the reverse, and about 1,500 beads of semi-precious and precious stones, many of them bearing etched designs as also fragments of black-and-red pottery.

From Atghara, Sri P. C. Dasgupta, Asst. curator, and Sri A. Chatterjee have collected an early terra-cotta relief envisaging a male warrior of great dignity and poise whose elegance is reminiscent of Jagayyapeta reliefs, although the graceful folds of the raimant betray obvious influence of Hellenistic technique, heads of Apsara and a male with twigs of tree growing from the Usnisa, elephant with riders and fine examples of Roman rouletted ware of the early Christian eras. A terra-cotta seal with tree motif inscribed with Brahmi character is another important relic collected by Sri S. Samanta.

Boral, an associate site on the Adiganga only about five miles from South Calcutta, where Kushan terra-cotta lamps and elephants were discovered by Sri D. P. Ghosh, Curator, about 20 years ago, has also recently yielded rouletted wares, early bricks and figurines.

Collection and Gifts—During this period many objects of art and antiquity were either collected or acquired as gifts from benevolent donors. To the credit of Sri Gaurmohan Ganguli goes the collection of (a) a remarkable terra-cotta Buddha inscribed with the usual Buddhist formula in characters of early Gupta period from Tilda, District Midnapur, (b) an impressive statue in chlorite, unique in Eastern India, of a bearded royal personage, apparently in the pose of a Bhakta, flanked by figures of his family and attendants of about 11th century A.D. from Contai, District Midnapur, (c) a monumental stone image, rather damaged, but iconographically important of a snake hooded, twelve handed Visnu-Lokeswar of c. 10th century A.D., from Sanchra, District Burdwan and lastly, (d) a rare black stone image of Siva Isana (c. 12th century A.D.) from Byabarttahat, District Midnapur.

Of the gifts mention may be made of five stone images of the Pala-Sena school from West Dinajpur by Sri B. C. Ganguli, I.A.S., which include three rare specimens representing. (a) a

Visnu-Vamana (c. 8th-9th century A.D.), (b) a seated Gaja-Laksmi (c. 12th century A.D.), and (c) a Sadasiva (c. 12th-century A.D.); also a seated bronze image of Buddha (c. 10th century A.D.) from Maynamati have been made over by Srimati Hasirani Ghosh.

Prof. Rajkumar Chakrabarti presented four gold coins including one of Akbar (1575 A.D.), one of Muhammad Shah (1738 A.D.) and two of Shah Alam II. Another gold coin of Shah Alam II was presented by Srimati Malaya Raychaudhuri.

Excavation—Excavation was carried on at Chandraketugarh, 24-Parganas, under the guidance of Sri Kunjagobinda Goswami, M.A., Excavation Officer, assisted by Sri P. C. Majumdar, M.A., of the Department of Pali, for two months in February-March, 1958. The work was continued in the last year's trench (No. 1) near the rampart wall to the west of the Berachampa-Haroa road with satisfactory result. The pottery pipe drain which was discovered last year was followed up to a certain length. Indications of different periods of human habitation were also available in course of the excavation at this place. Some of the portable antiquities are very important and also unique. These consisted of various types of pottery including roulettes pattern, N.B.P. and a rare specimen of copper punch-marked coin, a terra-cotta two-legged armless serpent deity with round eyes and indented circles on the body, a good ivory bead and a part of an ivory bangle, etc. Some of them were very probably associated with the Mauryya and pre-Mauryya periods. Similar serpent deity dated about the 6th-7th century B.C. have been excavated by the Archaeological Survey of India at Sonepur and other places in Northern India. However, it is for the first time that examples of such remote antiquity are found in Bengal through excavation.

The second site where the digging was started for the first time this year is locally known as *Khana-Mihirer Dhipi*. This mound is about 14 ft. above the road level. A trench 200' x 20' divided into 10 squares of 20' x 20' each, dug there brought to light two feet below the surface, the western wall of a stupendous brick structure the existing height of which is 14 ft. 6 in. with walls 4 ft. wide. This huge structure could not be fully unearthed this year, but from the study of the architecture of the exposed portion it is expected that the total length of the western face of the building would be 154 ft. with re-entrant angles at different places. It is further supposed that each of the other three sides is also likely to have this measurement. Because this structure is likely to turn out to be one of the varieties of the *Sarvato-bhadra* type of buildings. It was probably used as a temple. Further excavations are expected to throw more light on the date and particular cult or religion to which this stupendous

structure belonged. But at present it may be tentatively supposed that the date of the first construction of the building would not be later than the Gupta period. Below this building, i.e., at an earlier period we find that there was the age of the title shed at this mound also. This seems to be a highly disturbed area and even the so-called temple shows marks of repair and renovation at different ages. The occupational periods so far exposed in this area are estimated to be six in number beginning with the pre-Gupta and ending with the post-Pala ages. The area being disturbed the antiquities seem to have been removed from their original places and so they cannot be taken as sure guides for dating. Some of the interesting antiquities recovered from this and the previous sites consist of (1) various types of pottery objects including a long necked red ware jar possibly of pre-Mauryan origin meant for domestic use and storage from Period I, examples of N.B.P. and grey ware, some with rouletted designs and stamped motifs, notably a black potsherd with bird motif reminiscent of Arikamedu and pointing to Roman contact from Period II, (2) a few copper coins, one of which is a punch-marked coin and the rest cast coins of remarkable variety, (3) terra-cotta plaques containing mithuna or erotic couples obviously showing the influence of the Kama-sutra of Vatsyayana in c. 1st-3rd century A.D. and (4) terra-cotta peacock toy cart and a rare glass-coated gold bead.

The excavation party included among others three research scholars, viz., Sri Mrinalkanti Pal, M.A., Sri Chittaranjan Raychaudhuri, M.A., and Sri Anilchandra Pal, M.A., as well as several Post-Graduate students.

Paintings, textiles and folk art—Some rare paintings of excellent workmanship of the Mughal, Rajasthan (specially Kotah-Bundi) and Hill schools, large painted banners showing Krishna legend and epic scenes from Jodhpur and some textiles including a fine old coloured muslin piece from Dacca of the "Agni-phool" variety were purchased for the Museum. Numerous objects of Bengal folk-art in terra-cotta, clay pith, wood; Kanthas, Pata and Pats of exquisite variety were added to the Folk-Art Gallery which is a distinctive feature of the Museum. Some interesting African tribal wood carving and Red Indian dolls were collected by Sri P. C. Majumdar and Dr. K. Ganguli, University Lecturers from East Africa and U.S.A. respectively.

Coins—236 coins were acquired by the Museum in this period. The early coins include gold coins of Kadphises II, one Kidara Kushan ruler and Kumaragupta I, numerous uninscribed copper cast coins and several silver punch-marked coins from Harinarayanpur and Chandraketugarh whereas among the later coins may be mentioned a number of rare copper coins of King

Ansuvarman of Nepal and several gold pieces of Akbar, Muhammad Shah and Shah Alam II.

Preservation and cleaning—The Preservation Section under Dr. M. N. Basu, M.Sc., D.Phil., cleaned many coins terra-cottas, bronzes, paintings, etc. and arrested their gradual corrosion and decay with the assistance of Sri Tarun Bagchi, M.Sc.

Art Appreciation Course—The Teachers' Training Certificate Course in Art Appreciation was held in the Museum during the months May-August, 1957, 12 students were admitted and passed the examination—three with distinction.

Visitors—During the period under review more than 3,600 visited the Museum, among whom mention may be made of the members of the U.K. Commonwealth Delegation, Stuart Welch of Fogg Art Museum, Harvard University, Richard Ettinghausen of Freer Art Gallery, Washington, Bevgt Hager, Curator, Stockholm, Sweden, Max Lochn, Professor of Far Eastern Art, University of Michigan (U.S.A.), Douglas A. Allan, Curator, the Royal Scottish Museum, Edinburgh, U.K., T. Burrow, Professor of Sanskrit, Oxford University, Dr. E. Waldsmidt, University of Hamburg; Dr. Warner Spiser, Curator, Museum of Far Eastern Art, Cologne, Germany, Dr. Monomohan Das, Deputy Minister of Education and Scientific Research, Government of India, as also the members of Nepal University Commission.

Other activities—The Curator Sri D. P. Ghosh, M.A., presided over the All India Museums Conference, for the second successive year, held at Anand in December, 1957 and simultaneously attended the 20th session of the Indian History Congress, Anand, as a delegate of the Museum. He was also invited to deliver two lectures on Museology by the University of Baroda early in January, 1958. Dr. K. Ganguli, M.A., D.Phil., who was deputed by the Government of India, during the period under review, to U.S.A. to study General Education took the opportunity to visit and study the principal Museums of U.S.A. and Europe. Among the publications mention may be made of the following:—

D. P. Ghosh—"Archaeological Discoveries in Lower Ganges Valley", Indian Science and Culture, December, 1957.

P. C. Dasgupta—"The Early Terra-cottas from Tamralipta". Indian Folk-Lore, January-March, 1958.

Department of Education and Teachers' Training

During the period under review Sri K. K. Mookerjee, Head of the Department guided the research work of a Jnanendramohan Sen Scholar and a Sarala Sen Scholar, who worked

respectively on the following problems: (a) John Dewey and his Educational Philosophy: A critical study; (b) Teacher Education in West Bengal. Two other Jnanendrainohan Sen Scholars worked under the direction of Sri D. N. Ray—one on Evolution of Curriculum in the Secondary Schools of West Bengal, and the other on Retardation among pupils of Class VI in the Secondary Schools of Calcutta. Besides, a number of candidates, who had been registered for the D.Phil. degree continued working under the guidance of the Head of the Department. Of the subjects under investigation mention may be made of the following: (i) Studies in the problem of Moral Education of school going children; (ii) An enquiry into the fundamentals of educational philosophy: Indian and Western.

Sri Mookerjee read a paper on 'Measures for improving Teacher Education in India' before the Teacher Training Section of the XXXII All-India Educational Conference held in Madras in December, 1957. The paper was later published in '*Education*' (Lucknow), Vol. XXXVII, No. 2 (February, 1958). He also published the following articles: (a) Leisure Hour Occupations (*The Bihar Educationist*, Volume V, No. 19, September, 1957); (b) Primary Education in West Bengal (Presidential Address before Nadia District Teachers' Conference); (c) Teacher and Society (*Abhyudaya*, November, 1957).

Sri M. C. Ghose, who has been carrying on investigations in connection with certain problems of Educational Sociology published the following papers: (a) Stanley Hall on primitive man (*The Teachers' Journal*, February, 1958); (b) The march of life through Associations (*The Calcutta Review*, March, 1958); (c) Education and the Standards of Social Progress (*The Calcutta Review*, April, 1958).

Sri G. B. Kapat published a paper on 'Experimental Study of Memory' (*Indian Journal of Psychology*, Vol. XXXI).

Extension lectures were delivered by the following distinguished persons on the topics noted against the names of speakers:

(i) Dr. Frank Snowden, Dean of the College of Liberal Arts, Howard University, U.S.A.,

(General Education in the U.S.A.).

(ii) Dr. Archie L. Meneal, Director of Libraries, University of Miami, U.S.A.,

(Libraries in General Education).

(iii) Dr. Bijanbehari Bhattacharyya, Lecturer, Calcutta University.

(Code in Telegraphy in Hindi and Bengali).

(iv) Sri Satyapriya Roy, General Secretary, All-Bengal Teachers' Association,

(Education in New China).

The British Information Services gave an interesting demonstration of educational films to the staff and students of the department. Excursions to places of educational and cultural interest were undertaken as usual, of which mention may be made of the visits to Sarnath, Vindhyachal, Chunar, Sarisha Ramkrishna Mission Ashrama Schools, Survey of India Office, the Indian Museum, Alipore Meteorological Observatory, etc.

Department of Journalism

The present report of this department relates to the period from the 1st June, 1957 to the 31st May, 1958. During the period under review, over and above the general work of the department, some special lectures were arranged for the students of the department.

A reception was arranged on the 7th January, 1958, for Prof. N. V. K. Murthy, Head of the Department, Osmania University, Hyderabad, who was kind enough to pay us a visit with his students. They met the staff and students of this department in the Darbhanga Hall and the occasion gave an opportunity for exchange of ideas and establishment of personal relationships.

Sri S. N. Banerjee, Mg. Director, Clarion Advertising Agency Ltd., Calcutta, kindly met the students on the 1st March, 1958, and gave a talk to them on the methods of advertisement and layout. Mr. Norman Isaacs, editor, Louis Ville Times, U.S.A., and Mr. Roy L. Matson, editor, Wisconsin State Journal, U.S.A., were kind enough to meet our students on the 3rd April, 1958, and delivered lectures on "India in the American Press" and "The Making of an Editorial Policy" respectively. Sri S. Banerjee, Secretary, Advertising Club, Calcutta, kindly met the students on the 12th April, 1958, and gave a talk to them on the methods of advertisement and layout.

University Halls and Hostels

New Halls & Hostels—As reported last year the premises No. 45 Beniatola Lane, were not available to start the proposed Hostel for Post-Graduate and Under Graduate Lady Students. The Post-Graduate Lady Students' Hall at Hastings House Compound has been started from 1st July, 1958.

Concession in seat rent—(a) Usual concessions were granted to deserving boarders on the recommendation of the authorities concerned and (b) usual stipends were also paid to deserving students belonging to the Scheduled Caste Community residing in the approved Halls and Hostels.

Inspection & Licence—Licences were renewed for the session 1957-58, on the report of inspection to 13 non-collegiate hostels including 3 lady students' hostels. Number of seats in these hostels were 630 for boys and 111 for girls.

Management of the University Halls & Hostels—For the general supervision of the University Halls and Hostels there is in each Hall and Hostel a Supervising Staff consisting of a Superintendent, an Assistant Superintendent, Steward or Matron and a number of Menial Staff to help the boarders. The boarders get free medical aid and are helped to build a corporate life in the Halls and Hostels. The boarders themselves make arrangements for their own messing in the Hall and Hostel in accordance with the rules framed by the University. The general health of the boarders is reported to be good.

During the Summer and the Puja holidays parties of students from different Universities of India, who visited Calcutta on educational tours, were accommodated in the Hostels as far as practicable.

The want of a suitable hostel for foreign students was keenly felt. Several applications for hostel accommodation from foreign students reading in this University had to be refused. The demand from Indian students for hostel accommodation will be largely met when the 100 seated Post-Graduate Hostel for men students at Hazra Road will be opened in December, 1958.

The Board of Residence & Discipline met 5 times during the year 1957-58.

✓ University Library

Accommodation—There was no improvement of the situation arising out of the problem of accommodation in the University Central Library during the year 1957-58, as no additional accommodation was made available in this period to the library for its ever-increasing number of books and readers. A new plan of the library building was prepared by the architects, Messrs. Ballardie Thompson and Matthews during the year, which was examined by the Library Committee of the University Grants Commission towards the end of the year. Further progress in the matter may be expected after the plan is finally approved. At the request of the University Library Committee the authorities of the University College of Arts promised to release in favour

of the library the remaining rooms except one on the third floor of the Asutosh Building which are at present shared by the Central Library along with the college when the Department of Economics shifts to its new building.

The offer of a gift of the collection of the Maharaja of Cossimbazar made to the University a few years back was withdrawn by the donor as the Universiy could not, for want of accommodation, bring the books down to the University from Cossimbazar during these years.

A known fact may also again be pointed out here. The Library stack room being located on the top floor of the building which is not air-conditioned, the books have been, due to their being exposed to excessive heat in the summer months, fast deteriorating and many of them have already become extremely brittle or damaged in course of the last 28 years. So not only the problem of accommodation for the library but also the question of housing the stock of the library in a quarter suitable for the purpose deserves early attention of the authorities concerned.

Library Committee—The Library Committee was reconstituted under the Statutes.

During the year 1957-58, the Committee met 5 times while it met 4 times in the previous year. A revised set of library rules was adopted by the Committee during the year under review.

Administration—Sri S. K. Mookerjee, Deputy Librarian officiated as Librarian for 20 days when the Librarian went on leave in March-April, 1958. The Officiating Librarian represented the University Library at the Bengal Library Conference held at Navadvip in April, 1958.

Library Hours—As usual the Library remained open from 7 A.M. to 9 P.M. on week days and from 12 noon to 4 P.M. on Sundays all the days in the year except University holidays. During the Puja holidays the Reading Hall was kept open from 1 P.M. to 8 P.M. daily for 12 days.

Gift and Accession—Total addition to the stock of the library during the year 1957-58 was 9,550 vols. against 10,270 vols. in the previous year. The above figure does not include the number of bound vols. of periodicals added to the Library. The usual library Budget grant for books and journals was Rs. 70,000. A sum of Rs. 70,000 was also sanctioned by the University Grants Commission for the purchase of books and journals for the year 1957-58. Out of this grant a sum of Rs. 40,000 was earmarked for books and journals on Scientific and Technical subjects and a sum of Rs. 30,000 for books and journals on Humanities. Intimation was also received during the year from the University Grants

Commission to the effect that a sum of \$20,000.00 had been allotted to this University for the purchase of books and journals out of the India Wheat Loan Educational Exchange Programme for the year 1956-57. Transactions relating to the purchase of books and journals out of the U.G.C. grant and submission of requisitions under Wheat Loan Programme were not completed when the year elapsed.

Of the total vols. added to the library 4,104 (including acquisitions under Wheat Loan Fund) vols. were received as presentation and 71 vols. on exchange of University Publications against 1,721 and 71 vols. respectively in the previous year.

Periodicals—The number of periodicals received during the year 1957-58 was 906 against 816 in 1956-57. Of 906 periodicals received 754 were subscribed whereas the number of periodicals subscribed in the previous year was 706. Some 152 journals were received from various sources as gift or on exchange, the number under the same head in the previous year being 110. Of the total number of periodicals 484 were retained in the Central Library against 299 in the previous year and 422 were sent to the various Departmental libraries against 407 in 1956-57.

Classification and Cataloguing—The old practice of classifying most of the new accessions according to the Dewey Decimal system and books on Sanskrit and Bengali as well as old serials and Government publications, etc. according to the old schemes continued during the year under review. The usual card catalogue for all publications classified and catalogued during the year was maintained besides the book form of catalogues for books classified according to the old scheme. The book form catalogues for (Lending Section) books on History, Philosophy and Bengali were retyped and cyclostyled as the old copies of them were no longer usable. In all 5,057 vols. of publications were classified under Dewey system of classification and 1,488 vols. under the old schemes of classification. Thus the total number of vols. classified was 6,545, all of which were also catalogued. 18,889 cards were prepared for the books catalogued. The number of vols. classified and catalogued during the year 1956-57 was 3,524 and the number of cards prepared was 12,080.

Progress of the printing of the catalogue of books of the P. C. Ghosh collection was hampered during the year as Dr. S. C. Sengupta intimated his inability to look through the proof of the catalogue after he had gone through a small portion of it. Sri T. N. Sen of the English Department, however, subsequently kindly agreed to undertake the work at the request of the Library Committee.

Library Cards—The number of library cards issued to the readers under various categories during the year was 6,825 against 6,199 in the previous year. Of the total cards issued 2,901 were for the Lending Section against 2,894 in 1956-57. The number of Library Deposit Refund cases dealt with was 913 in 1957-58 against 824 in the previous year.

Library Bulletin—12 issues of the Library Bulletin giving classified list of monthly additions to the Library were brought out against 11 issues in the previous year.

Book Binding—2,613 vols. of books and journals were bound at a cost of Rs. 4,999.28nP. during the year, the corresponding figures for the previous year being 2,676 vols. and Rs. 5,058.50nP. Of the 2,613 vols. of books bound in 1957-58, 2,476 vols. belonged to the Central Library and 137 vols. to the departmental libraries. The corresponding figures of the previous year were 2,508 and 168 volumes respectively. The cost of binding books belonging to the Departmental and seminar libraries was Rs. 378.49nP. in 1957-58 as against Rs. 382.89nP. in the previous year.

Book Issue—During the period under review the number of books and periodicals issued in the Reference Section of the Central Library was 2,40,930 and that in the Lending Section was 50,502. Thus the total number of books issued in the Reference and Lending sections of the Library was 2,91,432 as against 2,54,338 in the previous year.

Inter-Library Loan—Under the usual Inter-Library Loan system, the Library borrowed 50 volumes of books and other materials from various libraries and lent out 274 volumes to other libraries and institutions. The corresponding figures in the previous year were 32 and 99 respectively.

Information Service—Information service was also maintained all through the year and all enquiries relating to bibliographical matters and various topics were attended to both on the spot and through the post. The Information Service Section was reorganised during the year. A good number of ready reference books were collected and shelved together near the special reading room and an Assistant was placed in charge of them. Answers to the important reference queries were recorded in card form to facilitate future reference to them.

Department and Seminar Libraries—Statistical reports for the period under review from 16 departmental and Seminar Libraries out of 22 were received in time for inclusion in this report. Statistics relating to these libraries is given in the Appendix.

According to a decision of the Library Committee several departmental and seminar libraries were inspected by the Deputy Librarian and Assistant Librarians during the year 1957-58.

Visitors—Throughout the year under review the library was visited by various parties and individuals both Indian and foreign including Dr. Werner Pischel, son of Dr. Richard Pischel whose rich collection of books is maintained in the library as a special collection under the name, *The 'Pischel-Collection'*.

Exhibition—The Library participated in an exhibition on the Revolt of 1857 organised by the National Library, Calcutta in August, 1957. It also participated in a similar exhibition organised by the Asiatic Society earlier. An Exhibition Case was permanently placed during the year under review in the Main Reading Hall for display of rare books, MSS. and other materials from time to time.

Miscellaneous—A long-felt want for cool drinking water in the summer was removed to a considerable extent by the installation of a water cooler on the library floor of the Asutosh Building.

Professional Activities and Achievements of the Staff—The Librarian, the Deputy Librarian and Assistant Librarian Sri Sibsankar Mitra contributed articles on library and allied matters to several journals, periodicals and newspapers. The Deputy Librarian also submitted a paper on the problem on Indian Surnames to the 3rd Indian Standards Convention held at Madras in December, 1957.

A book under the title *Granthagar Vijnan* by Sri S. K. Mookerjee, Deputy Librarian which was reported to be under print in the previous year was published by a local publisher during the year under review. A publication under the title *Granthagar: Pathak o Karmi* by Sri Rajkumar Mukherjee of the Technical Section of the Library was brought out by another local publisher during the year 1957-58.

Librarianship Training Department—Three meetings of the Librarianship Training Committee were held during the year 1957-58. 48 students were admitted to the course for the session 1957-58 out of 389 applicants. The number of applicants for admission to the course in the previous year was 358. The number of candidates who appeared at the Diploma in Librarianship Examinations held in August, 1957 and December, 1957 was 22 and 8 respectively and the number of successful candidates in those examinations was 21 and 8 respectively. Of the successful candidates in the August Examination 6 passed in the First Class, 10 in the Second Class and the rest in the Third Class. Of the 8 successful candidates of the December, 1957 Examination, 3 passed in the First Class, 3 in the Second Class and 2 in the Third Class. During the year 1957-58, no decision was taken on the question of introduction of the Librarianship Degree Course.

VIHARILAL INSTITUTE

The most outstanding event during the period is the expansion and further development of this department into the Viharilal Training College of Home and Social Science consisting of two more sections, e.g., sections for (a) General Intermediate and Degree Course with special bias to Home and Social Science, and (b) Post-Graduate Teachers' Diploma Course in Home Science.

The Viharilal Institute, therefore, provides instruction in the following three courses:—

- (1) Under-Graduate Diploma Course in Home Science entitled as the Diploma in Domestic Science Training Course
- (2) Post-Graduate Diploma Course in Home Science.
- (3) General Intermediate and Degree Course with special bias to Home and Social Science.

The new building of the college at Hastings House compound, the foundation stone of which was laid by Dr. B. C. Roy, the Chief Minister, was inaugurated in 1957 by Dr. J. C. Ghosh, member, Planning Commission, Government of India. The college with its new section started functioning from 15th November, 1957, in the old rented premises of the Viharilal Institute at 45, Beniatola Lane. The new premises of the Viharilal College at Hastings House compound has recently been ready for occupation and the whole Institute with all its different sections except the hostel has been shifted there. The college work was formally started at the new building on 21st July, 1958, when Dr. B. C. Roy, the Chief Minister, Government of West Bengal, Prof. Kabir, the Minister of Scientific Research & Culture, Government of India, and Dr. J. C. Ghosh, member, Planning Commission sent their blessings and good wishes for the prosperity of the Institute.

The Girls' Hostel also (V. L. Mitra Hostel—Domestic Science Training Department Hostel) on the 2nd floor of 45, Beniatola Lane has been further developed and expanded. The whole of the premises there has been converted into the Viharilal College Hostel save one or two rooms on the first floor where Practical Classes in Science are still being held. About 35 students of the Viharilal College have been accommodated there at present.

BOARD OF HEALTH

During the period under review the Board of Health was responsible for organising and implementing the following activities:—

(1) General Medical Check-up of students (1st, 3rd, and 5th-year).

(2) After-care and follow-up work.

(3) Maintenance of an Eye Clinic.

(4) Inter-Collegiate and Inter-University Youth Festivals.

(5) Organising Labour and Social Service Camps for students.

(6) N. C. C.

(7) Scheme for Apprenticeship Training in Village Development to Selected University Students and Teachers.

(8) Youth Leadership Training Camp for Teachers.

General Medical Check-up—During this period the Board examined about 4,000 students (including 700 Women students) of 11 affiliated colleges in and about Calcutta. Each student examined was given a report of his Medical Examination.

After-care and Follow-up Work—In addition to the above 183 students were examined by the After-care officer attached to the Board and arrangements were made for admission into the hospital for 90 students, in 11 cases X-ray plates were taken to come to a proper diagnosis; in 12 cases arrangements were made for Dental treatment and in 70 cases the students were examined and advised.

In the Eye-clinic maintained by the Board about 1,800 Dark Room Examinations of vision were carried out and arrangements were made with Optical Firms for supply of about 300 pairs of glasses at concession rate to students. In 26 cases glasses were given free to needy students, the cost being borne by the University.

Under the Patronage of the Vice-Chancellor and Syndicate, the Board has made notable progress towards medical examination and medical attendance for students, and has been planning for establishment of a Polyclinic for student and staff of the University and 4 Health Clinics to render medical relief to students in different parts of the city. Further a scheme for establishing a Mass Miniature Radiography unit and a Dental Clinic for students is under consideration.

Extra Curricular Activities:—

Inter-Collegiate and Inter-University Youth Festival—In addition to the above activities the Board organised an Inter-Collegiate Youth Festival in which about 500 students from 27

college units participated in the following items:—(1) Arts and Crafts, (2) Dance-classical Solo and Group, (3) Vocal Classical, Solo (Non-classical Vocal) and Instrumental Music, (4) Drama, (5) Radio Play, (6) Hindi Elocution, and (7) Recitation (Bengali and Sanskrit). A contingent consisting of about 60 members including students, selected out of best performers in Inter-Collegiate tests, teachers and accompanists participated in the 4th Inter-University Youth Festival organised by the Ministry of Education, Government of India, New Delhi.

Labour and Social Service Camps —The Ministry of Education, Government of India sanctioned three Labour and Social Service Camps to be organised by colleges and sponsored by the Board during the period under consideration.

N.C.C.—The Board examined 47 students for physical fitness to be enrolled as cadets in the University Independent Coy (12th Bengal Bn. N.C.C.).

Scheme for Apprenticeship Training in Village Development to University Students and Teachers —Under the above scheme the Board selected 146 students and 8 teachers from amongst different affiliated colleges in West Bengal and has arranged for undergoing training in Village Development in different C.D.P. or N.E.S. Blocks under the Development Department, West Bengal.

Youth Leadership Training Camp for Teachers —The Board deputed five teachers selected from different affiliated colleges to participate in the Youth Leadership Training Camp to be held at Tara Devi, Simla Hills, organised by the Ministry of Education, Government of India. Such camps are usually organised by the Ministry with a view to giving a short term training to teachers of colleges and Universities in the technique of organising co-curricular activities for students.

Appointments and Information Board Students' Advisory Bureau (Overseas)

This University is the first of its kind in India to establish an Appointments Board as far back as 1937. Our another department under the style Students' Advisory Bureau (Overseas) was established in 1926. These two departments and our "Central Enquiry" were amalgamated and reorganised with the beginning of 1956, when the present Secretary was appointed with added responsibilities. The Board has now the following sections:—

Appointments Service —The essential function of this service is to secure employment for University trained (various faculties) students and to arrange practical training facilities in every field of employment as far as possible, besides providing

advice and guidance on careers. The Board is constantly in touch with potential employers, and maintains Registers for qualified candidates and makes recommendations after interviewing candidates to firms when requested.

Advisory Services.—This section gives advice to students at any time during and after their University course, and others on all matters concerning employment, careers, etc. This section also offers advice and information to students and the public alike regarding facilities available for higher studies and research in various faculties and for practical training overseas and to secure for them in conjunction with our foreign offices, admission to academic and professional institutions and facilities for practical training in industrial and commercial firms.

Information Service —This service provides up-to-date information regarding various courses of studies offered by different Indian Universities and Technical Institutions, various competitive examinations and other recruitments by Government and Semi-Government Departments, etc.

Enquiry —There is a Central Information centre for the purpose of supplying information and assistance to the students and the public alike on matters mainly concerning different examinations of this University.

There is a constituted Committee appointed by the Syndicate to supervise the working of this organisation.

The Board's services are being very much widely used now than ever before and the students and guardians are looking to the Secretary for guidance on careers. The Secretary's work is very largely advisory—offering advice and guidance regarding careers and employment to students, guardians and others. It is desirable, and perhaps very important, for the students, to offer advice and guidance rather than just to act as a placing agency.

All the four important Chambers of Commerce in Calcutta were contacted and they all have issued circulars to all their member-firms requesting them to make use of the services of the University Appointments Board. Visits are being made to firms after issuing circular letters or by appointment on the telephone. Endeavours were made to renew contacts with commercial and industrial community and all the firms, we contacted, expressed their willingness to support our Board.

A scheme of further expansion of the activities of the University Appointments Boards has been submitted to the Registrar to be forwarded to the University Grants Commission.

There is more or less no restriction now on the release of foreign exchange facilities for studies—training abroad except a few not very useful subjects.

During the period under review the Appointments and Information Board recommended candidates to twenty-two firms and organisations. The nature of vacancies for which recommendations were made is given in the Appendix attached.

As for the Commissioners for the Port of Calcutta, the Commissioners issued advertisement in the daily papers regarding the recruitments. In the advertisement they directed the candidates to obtain the prescribed application forms from the Appointments Board and to submit the completed applications to the Board. The Board distributed 987 forms to the prospective candidates and actually received back 278 applications. After the preliminary screening on the basis of paper qualifications 111 candidates were selected for interview before the Selection Committee. This Committee interviewed the candidates for three days and selected 29 candidates for recommendation to the Port Commissioners. The recommendations were sent on 25th April, 1958.

During the period under review a good number of people, either the candidates themselves or their guardians, daily came to the office of the Board and consulted the regulations of the different competitive examinations conducted by Union or States Governments. The Board's office was also consulted for different Technical Training facilities in the country.

During the period under review 122 candidates registered their names with the Board for employment. Out of these 30 were Arts graduates, 52 Science graduates, 20 Commerce graduates, 5 Engineering graduates, 2 Medical graduates and 13 Under graduates.

During the period under review 392 applications were received by the Students Advisory Bureau (overseas) for studies training abroad and offers of admission were secured on behalf of 139 students.

Practical Training in Works—Six applications were received for training in Netherlands of which four were for ship-building industry. The Netherlands authorities, however, regretted their inability to offer training facilities in the ship-building industry up to the end of 1958. As regards training in Germany we were informed by our Embassy in Bonn that applications for practical training should be forwarded to the Ministry of Commerce and Industry and to the Ministry of Education, Government of India, New Delhi, as in the case of practical training facilities in the U.K.—all applications must be forwarded to the Union Ministry concerned by the Universities.

UNIVERSITY SPORTS BOARD

1. Inter-Collegiate Tournaments

Football.—During season 1957, 33 colleges participated in the Football league as against 28 in 1956. These colleges were divided into five groups. The following colleges were the winners:-

- | | |
|-------|---------------------------------------|
| Group | I—Charuchandra, |
| | II—Vidyasagar. |
| .. | III—Surendranath, |
| .. | IV—Bangabasi, |
| .. | V—City and R. G. Kar Medical jointly. |

In the knockout tournament (Principal Herambachandra Maitra Memorial Shield) 32 colleges participated. For the second-year in succession Asutosh College was the winner with Surendranath College as runner.

Zonal Tournaments were held at Burdwan, Birbhum, Midnapore, Bankura and at Jalpaiguri. Midnapore College became the winner in Bankura-Midnapore zone for the third-year in succession.

Swimming.—Inter-Collegiate Swimming Competition was held at the Azad Hind Bag on the 12th, 13th and 14th September, 1957, and students from Vidyasagar, Post-Graduate, City, Scottish Church, R. G. Kar Medical, Surendranath Commerce, Uluberia, Serampore, St. Paul's, Surendranath and Presidency participated in the competition. City College won the Sri Bhupen Basu Challenge Cup for team Championship.

Inter-Collegiate Women's Swimming Competition was held for the first time at the Indian Life Saving Society's pool on the 11th September, 1957, and students from City, Scottish Church, Gokhale Memorial, Institute of Education for Women participated in this competition. Gokhale Memorial Girls' College won the team championship. Sm. Rina Banerjee of the Gokhale Memorial won the individual championship.

Cricket.—29 colleges participated in the Inter-Collegiate Cricket league, including Burdwan Raj College, as against 25 in the year 1956-57. Colleges were divided into seven groups. Group winners were as follows:—

Group	I—Vidyasagar,
"	II—City,
"	III—C. U. Law,
"	IV—St. Xavier's,
"	V—B.E. College,
"	VI—Asutosh,
"	VII—Post-Graduate.

In the knockout tournament played among the group winners Calcutta University Law College won with St. Xavier's College as runner.

It may be noted here that the Inter-Collegiate knockout tournament (Principal S. Roy Memorial Shield) could not be held for want of sufficient number of playgrounds necessary to conduct both league and knockout tournaments in course of the time available.

Cricket Coaching.—The Cricket Association of Bengal placed the service of Sri D. G. Phadkar, the well known Indian Test Cricketer, at the disposal of the Board for coaching promising young college cricketers. The Board decided to utilise the services of Sri D. G. Phadkar to improve the standard of college cricket by deputing him to colleges, and to have a central coaching net at the University ground. The following colleges received Sri Phadkar's coaching at their college net:—Presidency, St. Xavier's, St Paul's, Vidyasagar, Scottish Church, City,

Bangabasi, Asutosh and Bengal Engineering College. A central coaching centre was opened for three weeks at the University ground (Maidan), for selected students. Excellent work was done by Sri Phadkar with the students, whom he coached for three weeks at the University net; one day coaching at the nine colleges also produced some improvement in the college teams. The Board places on record its sincere appreciation of the services rendered by Sri D. G. Phadkar for the improvement of the standard of cricket among the University and college cricketers. The Board also offers its grateful thanks to the Cricket Association of Bengal for having placed the services of Sri D. G. Phadkar at the disposal of the Board and trusts that the Cricket Association of Bengal will be pleased to extend the same facilities during the next cricket season and that we will be glad to welcome Sri Phadkar at the University net.

Tennis.—Inter-Collegiate Tennis Tournament was held on the University ground in December, 1957. St. Xavier's, B.E. College, Serampore, R. G. Kar Medical, City, Presidency, Charuchandra and Calcutta University Law participated in the tournament as against five colleges in the previous year. St. Xavier's College won the Winner Challenge Cup with Presidency College as runner.

University Athletic Championship was held on the 28th, 29th and 30th January. 72 students from Scottish Church, Asutosh, City, Sri Shikshayatan, Krishnagar, South Calcutta Girls', Victoria Institution, Loreto, Vidyasagar, Bethune, Maharaja Manindra Chandra College participated. Loreto College won the Sm. Jyotsnamoyee Bose Memorial Cup for team championship and Sm. Sunanda De of Scottish Church College won the Chancellor's Medal as best athlete of the meet. The number of entries showed considerable improvement over last year's figures.

Men's Championship was held on the 29th and 30th January, 1958. 172 students from 30 colleges participated. As usual St. Xavier's College won the St. Xavier's Cup for team championship with a record number of points. Robert Young of St. Xavier's College won the Chancellor's Medal as the best athlete of the meet.

Inter-Collegiate Basketball Tournament was held with seven colleges participating. Charuchandra College won the tournament and B. K. Das Memorial Challenge Cup with Bangabasi College as runner.

Inter-Collegiate Volleyball Tournament was held with thirteen colleges participating. City College won the tournament with Maharaja Manindra Chandra College as runner.

Inter-Collegiate Table Tennis.—For the first time Inter-Collegiate table tennis tournament for men students was held.

Hockey.—22 colleges participated in Inter-Collegiate Hockey league and 21 colleges participated in the knockout tournament.

Athletic Proficiency Test was held on the University ground on 18th, 19th, 20th, 21st, 25th, 26th, 27th, 28th March. 109 students appeared in this test.

2. *Inter-University Tournaments*

Inter-University Football.—The Calcutta University team won the North Zone Championship played at Bareilly for the third year in succession, and also won the All India University Football Championship for the second year in succession, played at Tirupati between the Bombay University, the winner of South Zone and Calcutta University, the winner of North Zone Tournament.

Inter-University Swimming and Waterpolo Championship was held at Calcutta under the auspices of the Board. Calcutta University won the Swimming Championship after a lapse of seven years with Bombay as runner. Calcutta also won the Waterpolo Championship by beating Bombay in the Final.

Inter-University Tennis Tournament.—North Zone Tournament was held at Calcutta under the auspices of the Board, 11 Universities participated and Calcutta won the North Zone Tournament by beating Delhi University, the holder of the North Zone title in the Final.

In the championship match between the Calcutta, the winner of the North Zone and Madras, the winner of the South Zone played at Trivandrum, Calcutta lost to Madras.

In the Inter-University Cricket Tournament held at Allahabad, Calcutta lost to Banaras in the first round.

Inter-University Hockey Tournament.—Calcutta participated in the Inter-University Hockey Tournament held in January at Saugar and lost to the home team in the first round.

3. *Rowing*

Eleven colleges are affiliated to the University Rowing Club with 200 members.

The University Rowing Club organised the following Regatta:—

- (1) Inter-Collegiate League Regatta,
- (2) Inter-Collegiate Sculling Regatta,
- (3) Monsoon Regatta,
- (4) Inter-Varsity Regatta,
- (5) Winter Regatta.

The Rowing Club also participated in the following Regatta:—

- (1) Head of the lake Regatta,
- (2) Inter-Varsity Regatta.

The Inter-Collegiate League Regatta was held in Fours in the month of November, 1957. St. Xavier's College was the winner and Vidyasagar College was the runners-up. In the Inter-Collegiate Sculling Championship Surendranath College was the winner and St. Xavier's College was the runner-up. The Inter-Collegiate Knockout Regatta will be held in the month of May, 1958.

The Monsoon Regatta was held in the month of August, 1957, and old and new oarsmen were mixed together in the crew for the improvement of the standard of rowing and for the benefit of the new members.

The University Rowing Club which participated in the Head of the Lake Regatta, won the Junior Fours clocking a very good time.

In the Inter-Varsity Regatta held in the month of February, 1958, between Jadavpur and Calcutta, Calcutta University was winner in Junior Fours and Pairs and won the Inter-Varsity Trophy.

Another new Regatta was introduced this year called "Winter Regatta". It was held in the month of February, 1958.

The annual function and prize distribution ceremony of the University Rowing Club was held on the 19th February, 1958 at the Club premises and our Chancellor Sm. Padmaja Naidu graced the occasion and distributed the Trophies and the Certificates of Honour.

CALCUTTA REVIEW

The Calcutta Review is perhaps the oldest journal of its kind in India and has a wide chosen and influential circulation all over the country and abroad. The journal is primarily circulated among University men and men of letters.

The Calcutta Review has enhanced the prestige and the high standard and traditions with which it has been associated since its inception. During the last twelve months we have been able to publish a considerable number of very valuable contributions from some of the most eminent men of India and outside—leaders in the realm of thought and culture, art and literature, education and scholarship, politics and economics and social and business organisation. It will be seen that the Review has been able to give to its readers and subscribers much more than one may get for Rs. 7-8-0 only per annum.

Contributions on subjects of general cultural and education interest as also articles on current political, economic, social, and cultural topics and movements of national and international significance are usually published in the Review. Such articles as indicate a high standard of scholarship and literary excellence are generally preferred.

The Review is under the direct supervision of a strong Board of Editors consisting of scholars of international reputation.

Particular issues of the Review such as the " 2nd Five Year Planning " Number were favourably noticed and highly spoken of by some of the influential Weeklies and Dailies throughout India and letters of good wishes were received from several eminent writers testifying to the usefulness of the journal and the high standard it has all along been maintaining in the field of journalism.

About twenty quarterlies (Indian and foreign), twentyfive Monthlies (Indian and foreign), twenty weeklies and several dailies in English and Bengali are received in exchange of the Review. The annual subscriptions of the papers and magazines received in exchange is estimated at Rs. 500.

II. Socio-Economic Survey of the City of Calcutta, 1957-58.

This department is in its fourth year and the work of collecting data was completed by the end of March, 1958. The Department has also collected data relating to small scale business units working in the city and a report on theses is now being prepared. The final Report on the Socio-Economic Survey of the city is expected to be ready during 1958-59. A monograph on Housing conditions in the city is being prepared and will be printed.

III. Diagnostic Survey of the Damodar Valley Region, 1957-58.

Early in 1957 the Government of India decided that, with a view to facilitating planned development, a diagnostic survey of the Damodar Valley Region should be undertaken on a co-operative basis by the Indian Institute of Technology, Kharagpur, the University Department of Geography and Economics and the D.V.C. A Technical Committee was set up by the Government of India to undertake this work. The Committee included amongst others, Dr. J. P. Niyogi. The Committee decided that as a preliminary step a survey of the Durgapur Sub-Region should be carried out. It was felt that this pilot survey was likely to prove helpful in planning the whole area. A batch of students of the Economics Department was sent out to participate in this work as field investigators.

The following lectures were delivered by foreign scholars to the students of the Economics Department :—

Dr. D. Delivaris—Inflation in Under-Developed Countries.
Prof. Hoselitz—Medium sized industries in rural India.

DEPARTMENT OF POLITICAL SCIENCE

During the year under review the total number of students on the Roll in the two M.A. Classes was 234. The total number would have been considerably larger if admissions had not been strictly restricted on a qualitative basis. Besides, there were several research students in the department.

It is gladdening to note here that a research student of this department, namely, Shri Amiya Chatterjee, M.A., was admitted during the year under review to the D.Phil. (Arts) Degree of this University for her thesis on "The Constitutional Development in India from 1939 to 1947". It is also gladdening to note here that in the Combined Examination for recruitment to the I.A.S., I.F.S., etc., held in September, 1957, by the Union Public Service Commission, two of our former students did well. One of them has since been appointed to the Indian Foreign Service, and another to the Indian Administrative Service.

Sri Subimalkumar Mukherjee attended the 20th Session of the Indian Political Science Conference held at Poona in December, 1957, and read the following papers there :—

- (a) "Interventions in Egypt and Hungary: their Legality, and the U. N. Action for Peace."
- (b) "The Concept of World Peace under the United Nations."
- (c) "The Second General Elections in West Bengal, 1957—An Objective Study."

The following papers were published by teachers of the Department during the period under review (1st June, 1957 to 31st May, 1958) :—

(3) A critical analysis and valuation of Subhadra Kumari Chouhan's stories with particular reference to their psychological background and contemporary thoughts.

DEPARTMENT OF COMPARATIVE PHILOLOGY

Prof. Sukumar Sen took part, as a faculty member, in the summer Schools of Linguistics held at Dehra Dun in the months of May and June, 1957.

He delivered, on invitation, three extension lectures at the University of Mysore in the month of September, 1957. He also delivered three extension lectures at Burdwan in February and March, 1958.

Prof. Sen is carrying on Dialectal Survey of West Bengal and he is progressing with the Etymological Dictionary of Old and Middle Bengali.

The following research scholars are working under his guidance :—

(1) Sri Deyanand Shrivastava, M.A., Khaira Research Scholar :

Syntax of Early Hindi Prose.

(2) Sm. Sunanda Sen, M.A., Post-Graduate Research Scholar :

Diction of Rabindranath Tagore's Poetry.

(3) Sri Satyaranjan Banerjee, M.A., Post-Graduate Research Scholar : (Resigned) :

Jaina Prakrt.

(4) Mr. Yasuaki Nara, M.A., Bipradas Palchaudhuri Foreign Scholar :
Buddhistic Sanskrit.

(5) Sri Siddheswar Hota, M.A., Professor of Sanskrit and Oriya, Sambalpur College, Orissa (on leave) :

Origin and Development of the Oriya Language.

(6) Sm. Sobha Ray, M.A., Professor of Sanskrit, Women's College, Cuttack (on leave) :

Historical Syntax of Oriya.

Professor Sen published the following books during the year :—

(1) Gauranga-viay (a sixteenth century Bengali text edited with Introduction, Notes and Glossary), Bibliotheca India, The Asiatic Society, Calcutta,

(2) History and Pre-History of Sanskrit (Extension lectures), University of Mysore, Mysore.

Professor Sen published the following paper during the year :

Syncopated Aspiration in Middle Bengali (Bagchi Memorial Volume of Indian Linguistics).

REPORT OF THE RESEARCH WORK (1957-58)

By SRI DWIJENDRANATH EASU

Engaged in revising his thesis on "Analytical Syntax of Old Bengal". Prepares a paper on 'A Phonological Account of a sound in Bengali' and read it in the All India Oriental Conference, held in December, 1957 at Delhi.

Published Papers :

1. "An Account of the Andamanese Dance, Songs and Folk-tales" (Indian Folk-lore, Calcutta, 1957).
2. "On the word Devara (Indian Linguistics, Bagchi Memorial Volume, Poona, 1957).
3. "Word Order of Vacatives in OB" (Indian Linguistics, Tarner Vol. Poona, 1958) (in press).
4. "Word Order of Negative Particles in OB (Journal of the Department of Letters, Calcutta, 1958) (in press).

DEPARTMENT OF ANCIENT INDIAN HISTORY

1. Prof. J. N. Banerjee—contributed six chapters in *Comprehensive History of India*, Vol. II, published by the Indian History Congress in December, 1957. He also read a paper in Section I of the Ballabh Vidyanagar Session of the Indian History Congress held in December, 1957.

2. Sri S. K. Saraswati contributed a chapter in *Comprehensive History of India*, Vol. II, published by the Indian History Congress in December, 1957. He read a paper in Section I of the Ballabh Vidyanagar Session of the said Congress held in December, 1957. His chapters respectively in *Bihar through the Ages and History and Culture of the Indian People*, Vol. VI, are in course of publication.

3. Sri N. N. Dasgupta edited a mediaeval Bengali text, Krishnamangala by Parasurama, which has been published by the Calcutta University.

4. Dr. G. C. Raychaudhuri published a monograph on "Early History of Mewar" in J. D. L., New Series, Vol. I.

5. Dr. S. R. Das published a monograph on the Ritual Drawings of Bengal in J. D. L., New Series, Vol. I.

6. Prof. N. Ray was actively engaged in his researches in Indian Aesthetics.

7. Dr. B. C. Sen was engaged in studies in Economic History of Ancient India and Asokan problems.

The following members of the teaching staff were engaged in guiding the research studies of the D.Phil. students :—

Prof. J. N. Banerjee, Prof. N. Ray, Dr. B. C. Sen, Sri S. K. Saraswati, Dr. G. C. Raychaudhuri, and Sri D. P. Ghosh.

✓ UNIVERSITY COLLEGE OF COMMERCE

Department of Commerce

Sri S. C. Sengupta, Part-time Lecturer in the University College of Commerce, read a paper in the 11th Indian Commerce Conference in December, 1957, entitled "Published Accounts of Joint Stock Companies" which was published in the December, 1957 issue of the Indian Journal of Commerce.

Sri Bishnupada Guha, a Research Scholar, is carrying on research on the "Labour Problems in the Coal Mining Industry in India" under the supervision of Dr. S. N. Sen Reader in Economics.

DEPARTMENT OF PALI

Professor Nalinaksha Dutta was elected President of the Asiatic Society. He has been entrusted with the editing work of the Jaina and Buddhist section of the Cultural Heritage of India. (R. K. Institute of Culture) He has also been editing the Journal of the Greater India Society

The papers written by him are:—

- | | |
|---|---|
| 1. Evolution of Mahayana Buddhism. | } Published in the Cultural Heritage of India. |
| 2. Buddhist sects in China, Japan, Burma and Ceylon. | |
| 3. Religious Developments in India from the Pre-Aryan period to the 3rd century, B.C. | } Being published as Chapter VI of Book I of the History of Ceylon (Ceylon University). |
| 4. Vajracchedikasutra of the Gilgit MSS. edited and printed. | |

| 7. Basic Teachings in the Majjhima Nikaya (II). | } Being a foreword to the Doctorate thesis of N. K. Sahu. |
| 8. Editing Bodhisattvahumi, a Ms. of Jayaswal Research Institute. | |

Dr. Anukulchandra Banerjee

Books—Subbasitaratnakarakandaka katha of Aryasura (accepted for publication by the Mithila Post-Graduate Institute of Sanskrit Learning and Research, Darbhanga, Bihar).

Papers—

1. The Background of Buddhism (Mahabodhi Vaishak Special Number).
2. Missionary Life of Gautama Buddha (Calcutta Review).
3. Dhamma of Gautama Buddha (Mahabodhi).
4. Mahayana Buddhism (Assam Government Research Society).
5. The doctrine of the bhumis (to be included in the encyclopaedia of Buddhism published by the Government of Ceylon).
6. Mahayana Buddha dharma (in Bengali) (jagatjyoti).
7. History of Buddhism (Journal of the Department of Letters, Calcutta University).

Sri P. C. Majumdar—went to the East African countries on a goodwill mission of the Indian Navy and visited the cultural institutes of Diego Suarez, Mombasa, Zanzibar, Dar-es-Salaam and Nairobi.

He conducted the excavation works at Bherachampa in the District of 24-Parganas, West Bengal.

He has written a paper on "A few Chinese Travellers visiting India in the Medieval Period" (published in the Calcutta Review, 1957) and on "An Analytical Study of the Lankavatara sutra".

PUBLISHED RESEARCH PAPERS

DEPARTMENT OF ZOOLOGY :

1. A study of the urinogenital system of Salientia, Part I. Ranidae and Hyperoliidae of Africa.—Prof. J. L. Bhaduri (*Ann Mus Roy Congo Belge. Sr. 8 Sci. Zool.*, Vol. 55, 1957).
2. The distribution of fry collection centres, methods of collection and the fry trade in the river Bhagirathi.—Dr. D. N. Ganguli (*Geographical Review of India*, Vol. XIX, 1957).
3. On the structure and the development of the Vertebral column in the House Gecko.—Dr. D. N. Ganguli (*Anat. Anz.* 105, 58).
4. Effect of estradiol monobenoate on the thyroïd gland of a common Indian lizard, *calotes versicolor*.—Dr. A. Ghosh (*Ann. Biochem. & Exptl. Med.* 18(3), 1958).

DEPARTMENT OF ANTHROPOLOGY :

1. How Korkus Live.—Prof. K. P. Chattopadhyay (*Journal of the Asiatic Society, Science* Vol. 22, No. 2, 1957).
Abst.—A detailed account of the material culture of Korkus. The technology of tools and implements is fully given.
2. On Polyandry.—Prof. K. P. Chattopadhyay (*Journal of the Asiatic Society, Science* Vol. 22, No. 2, 1957).
Abst.—A World survey of the customs of Polyandry, including a re-assessment of all available data in Asia, Africa, Europe and America and Oceania. The similarity of modern social trends under economic forces to limitation of family size to the motives underlying polyandry in most areas is indicated.
3. Santal Sibs—their traditional history and observed intermarriage frequencies.—Prof. K. P. Chattopadhyay (*Proceeding of the National Institute of Sciences of India*, Vol. 23B, Nos. 1-2, 1957).
Abst.—In this paper the writer notes a brief account of the traditional origin of Santal Sibs and of the tradition of separate demarcated states of each Sib. A statistical analysis is then carried out of 1540 Santal marriages to find out bias towards or away from marriage between different Sibs—the tradition of Marandi Kisku avoidance in marriage is tested to reports by some earlier observers a definite bias in favour of marriage in the mother's Sib by a man is proved by the figures of such marriage. A likely explanation is suggested.
4. Note on the Language Commission.—Prof. K. P. Chattopadhyay (*Science and Culture*, Vol. 28, 1958).
Abst.—A critical study of the principal recommendations of the Language Commission and has given some suggestions as to how they should be modified so as to be generally acceptable.
5. Personality and Culture.—Prof. K. P. Chattopadhyay (*The Indian Journal of Psychology*, Vol. 32, Parts I-II, 1957).
6. The Purums.—A Kurki Tribe of Manipur—Sri T. C. Das (*Vanya-jati*, Vol. V, No. 8, 1957).
7. Classification of the Tribals of India.—Sri T. C. Das (*Proceedings of the Fourth Tribal Welfare Conference held at Koratpur*).
8. The Dance among the Koms of Manipur.—Dr. M. N. Basu (*Indian Folklore*, 1957).

9. Social Pathology.—Dr. M. N. Basu (Vigil, 1957).
10. A Field approach to primitive technology.—Dr. M. N. Basu (Man in India, Vol. 38, No. 2, 1958).
11. Geological and Cultural Evidences of the Stone Age in Mayurbhanj (a joint paper)—Sri G. S. Ray (Man in India, Vol. 38, No. 1, 1958).
12. A Preliminary Note on the Kadars of Kerala.—Sri G. S. Ray (joint paper) (Science and Culture, Vol. 23, 1958).
13. Soanian and pebble-tool complex in India.—Sri D. Sen (Man in India, Vol. 37, No. 2, 1957).
14. Microflitic Industry of Singhbhum.—Sri D. Sen (Man in India, Vol. 37, No. 4, 1957).
15. Geological and Cultural Evidences of the Stone Age in Mayurbhanj.—Sri D. Sen, N. K. Bose and G. S. Ray (Man in India, Vol. 38, No. 1, 1958).
16. Finger prints of Orissan aborigines.—Dr. S. S. Sarkar and Sri A. R. Banerjee (Man in India, Vol. 37, No. 3, 1957).
- Abst.—Detailed analysis of the various types of finger print patterns has been made from a large collection of finger and palmar prints of several Orissan tribes (Juangs, Sabaras, Khonds, Gonds, Santals, Mundas, Panos, Kisanis and Pauri Bhuiyans).
17. Tribal population in West Bengal.—Dr. S. S. Sarkar and Sri P. Bhattacharyya (Man in India, Vol. 38, No. 1, 1958).
- Abst.—Demography of the tribal population of West Bengal in 1951, with reference to their sex ratio has been discussed. Confusion regarding the Mru and their doubtful existence have been discussed.
18. A Preliminary note on the Kadars of Kerala.—Dr. S. S. Sarkar (jointly) (Science & Culture, Vol. 23, 1958).
- Abst.—The racial affiliation of the Kadars of the Annamali Hills has been assessed from anthropometric measurements of 43 adult males and 37 adult females, 140 head hair samples, 142 blood samples and dermatoglyphics, of 80 male and 60 female individuals. The detailed report is in the process of being written up.
19. Further studies on the frequency of Multiplebirth in India.—Dr. S. S. Sarkar (Man in India, Vol. 38, No. 2, 1958).
- Abst.—The frequency of twin births has been found to be 1 : 92.7 in India. The study is based on the statistics collected from 49 hospitals in various parts of India during 1942-47.

DEPARTMENT OF PHYSIOLOGY :

1. Comparative study of iron distribution in liver. Sm. Jharna Ghosh, Dr. S. R. Maitra and Sri A. Basu (Ind. J. Physiol. & Allied Sci. 11, 4, 1957).

Abst.—Iron is distributed in the peripheral parts of the liver. There is no variation in different species in the distribution pattern of iron in liver as is found histochemically in rat, duck, guineapig, cuckoo, crow. In these species the peripheral part of liver is the main store of iron.

2. Kopsine and Strychine : A comparative study of their physiological properties.—Dr. S. R. Mukherjee, Dr. A. K. Maiti and Sri P. K. Dey (Nature, 180, 916, 1957).

Abst.—Kopsine, an indoline alkaloid, has been isolated from the leaves of *Kopsia albiflora*, Linn, and *Kopsia fructosa*, A. DC. (Apocynaceae). Structurally it has some similarity to some of the strychnos and picralima.

alkaloids. The physiological properties of kopsine have been studied on the plain muscles, on systemic blood pressure and on the toad's heart, and the results have been compared to those of strychnine under identical conditions. Physiologically, kopsine possesses cholinergic effects and its site of action is peripheral and not at the cerebrospinal axis as is that of strychnine. It has also been found that kopsine and strychnine do not antagonise each other.

3. Studies of blood volume and plasma volume in Hypothermia (using extracorporeal cooling technique) with radioactive Iodine human serum albumin.—Dr. S. R. Mukherjee, Sri B. Roy, H. K. Sen, in collaboration with A. Roy, P. K. Dey, S. K. Maiti (J. Expt. Med. Sc. 1, 47, 1957).

Abst.—Using 131 serum albumin decrease in blood volume and plasma volume was found to occur during hypothermia. Reduction of plasma volume was relatively greater than the total blood volume. Increased body haematocrit during hypothermia confirms the above finding.

DEPARTMENT OF GEOLOGY :

1. Fossil alga in a lignite from Nichahom, Kashmir—Prof. N. N. Chatterjee in collaboration with Dr. D. Chandra. Q.J.G.M.M.Soc. of India. Vol. XXIX, No. 3 (1957).

2. Permian Fossil Fungi in Kurasia Seam from Barakar Coal Measures, Kurasia Coalfields, M.L.—Prof. N. N. Chatterjee in collaboration with Dr. D. Chandra. Q.J.G.M.M.Soc. of India. Vol. XXIX, No. 3 (1957).

3. Sulphur forms in coal and their bearing on utilisation, Eastern Metals Review (Annual Number, 1957)—Prof. N. N. Chatterjee.

4. Translation gliding in deformed plagioclase from a banded norite in Origin—Dr. S. N. Sen. International Geol. Cong., 1958.

5. Translation gliding in deformed felspar—Dr. S. N. Sen. International Geol. Cong., Mexico, 1957.

DEPARTMENT OF PURE CHEMISTRY :

1. On the constitution of Sarpageine, the minor alkaloids of *Rauvolfia Micrantha* Hook and *Rauvolfia Beddomei* Hook. f.—Science & Culture, 22, 692 (1957)—Sunilkumar Talapatra and Asima Chatterjee.

2. Alkali degradation of aricine.—Science & Culture, 23, 20; (1957)—Asima Chatterjee and Sunilkumar Talapatra.

DEPARTMENT OF PURE MATHEMATICS

1. On a type of Riemannian Space conformal to a flat space—R. N. Sen. Jour. Ind. Math. Soc., Vol. XXI, Nos. 3, 4; September to December, 1957.
Abst.—In this paper a type of space is introduced which satisfies certain tensor equations. It is shown that if the type happens to be Cartan's symmetric, it is either a space of constant curvature, or else it admits a pair of teleparallelisms having properties analogous to those of Clifford's parallelisms.
2. A note on Implicit functions—H. M. Sengupta and B. K. Lahiri. Bull. Cal. Math. Soc., Vol. 49, June, 1957.
Abst.—A set of sufficient conditions have been given so that a functional relation may define a continuous function.
3. A note on derivatives of a function—H. M. Sengupta and B. K. Lahiri. Bull. Cal. Math. Soc., Vol. 49, December, 1957.

Abst.—This paper discusses certain properties of a point-set, where a function having an everywhere dense set of points of continuity and also an everywhere dense set of points of discontinuity has at least one of its derivatives infinite.

4. The doubly distributive m -lattice—A. C. Chaudhury. Bull. Cal. Math. Soc., Vol. 49, p. 71-74. 1957.

Abst.—It has been proved here that a doubly distributive m -lattice is a distributive lattice. Further three operations in such an m -lattice is connected a well known relation. This solves partly a problem proposed by G. Birkhoff.

5. A note on Ostrowski's generalisation of a theorem of Osgood—P. L. Ganguli. Bull. Cal. Math. Soc., Vol. 49, June, 1957.

Abst.—It has been shown that Ostrowski's theorem holds for a function of two variables, where it is a continuous function of one variable alone for each value of the other.

6. On a type of Einstein space—H. Sen. Bull. Cal. Math. Soc., Vol. 49, September, 1957.

Abst.—This paper generalises to n -dimensions certain known type of four-dimensional Einstein space which may either be of constant curvature or else of scalar curvature Zero.

7. On certain conformal mapping of a non-simple K -space—H. Sen. Bull. Cal. Math. Soc., Vol. 49, December, 1957.

Abst.—In this paper the nature of a space which is conformal to a non-simple K -space is investigated. It is shown that under certain circumstances may be a K -space and under others the covariant derivatives of the curvature Tensor of may be expressed in terms of the curvature tensor of and its vector of recurrence.

8. On the lattice of normal subfields—S. P. Bandyopadhyay. Bull. Cal. Soc., Vol. 49, No. 3, September, 1957 (pp. 139-45).

Abst.—The lattice of normal subfields of the splitting field of a separable polynomial over a field is isomorphic with the lattice of the classes of polynomials whose roots are birationally connected with the factors of the given polynomial. This leads to a Topology whose closed elements form a lattice isomorphic with the lattice of normal subfields. This gives a new approach to the Galois Theory of equations.

DEPARTMENT OF APPLIED PHYSICS

1. The dielectric properties of ester gum. A. K. Sen and G. N. Bhattacharya (Ind. J. Phys., Vol. 32, pp. 49-61, 1958).

Abst.-The dielectric properties of ester gum have been measured over a wide range of temperature and frequency, viz., from 22°C to 140°C and from 400 cycles per second to 300 kc/s. The resin shows characteristic polar properties and the region of anomalous dispersion extends over a wide range. The maximum value of dielectric loss at any frequency is less than that demanded by Debye's theory and the plot against gives a much blunter curve than the theoretical one indicating thereby a distributed relaxation time of the orientating dipoles. The radius of the rotating unit, calculated from data reported here and the melt-viscosity data published earlier, gives an average value of 1.5 Å only, which is the same as that of a hydroxyl group. From the consideration of composition of ester gum it has been postulated that the dielectric loss of this resin is mainly due to the presence of glycerol mono- and di-abietates in this resin.

2. Melt Viscosity of Ester Gum.—A. K. Sen and G. N. Bhattacharya (Jour. Assoc. App. Phys. Vol. 4, No. 2, pp. 72-77, 1957).

Abst.-Melt viscosity of ester gum has been measured over the range of temperature between 90°C and 125°C and activation energy for viscous flow has been calculated. The activation energy has been found to change abruptly round about 106°C. The value of the activation of energy has also been confirmed from the results of measurement of electrical resistivity of the material. The implications of this change of activation energy at 106°C has been discussed in this paper.

3. The dielectric behaviour of ester gum.—A. K. Sen and G. N. Bhattacharyya. (Science and Culture, 23, 45-46, 1957).

4. Application of Tensor in Transformer Circuits : III.—Problem of Magnetising current and performance characteristics of multi-winding transformer circuits.—S. P. Bhattacharyya. (Jour. Assoc. App. Physic. Vol. 4, No. 2, pp. 59-71, 1957).

Abst.-Tensor method is applied for finding out the performance characteristics of multi-winding transformers by assuming that the magnetising current flows through a secondary winding instead of a primary. This has been applied to a three winding transformer with two primaries and one secondary yielding results which are in agreement with those obtained from conventional methods.

5. Application of Tensor in Transformer Circuits : V.—The Moving Coil Voltage Regulator.—S. P. Bhattacharyya and M. N. Roy. (Journ. Assoc. App. Phys., Vol. 4, No. 2, pp. 78-86, 1957).

Abst.-Tensor method has been applied here in circulating the performance characteristics of the moving coil voltage regulator devised by Norris. Equations for voltages and currents under different load conditions have been obtained and verified.

6. Application of Tensor in Transformer Circuits : V. Performance characteristics of the moving coil voltage regulator.—S. P. Bhattacharyya. (Jour. Assoc. App. Phys., Vol. 4, No. 4, pp. 125-142, 1957).

Abst.-Tensor method has been applied to make a detailed study of different types of connections for the voltage regulator devised by Norris. Experimental arrangements were set up to verify the equations obtained. Good agreement has been observed between theoretical and experimental values.

DEPARTMENT OF RADIO PHYSICS

1. Relation between noon F2-layer ionization and magnetic dip—J. N. Bhar, J. Atmos. Terr. Phys., March, 1957, Vol. 10, pp. 168-172.

Abstract—The relation between noon F2-layer ionization and magnetic dip for constant values of the solar zenith distance has been studied from world-wide data for 1953, instead of local mean time.

2. Models of the lower ionosphere as may be inferred from absorption results—P. Bandyopadhyay, Ind. Jour. Phys., Vol. XXXI, No. 6, June, 1957, pp. 297-308.

Abstract—Values of deviative and non-deviative absorption and their variations with cost are calculated from some of the proposed D and E region models. The results obtained are compared with the available experimental data. It is found that so far as the E region is concerned, A. P. Mitra's theoretical model is most consistent with the observed diurnal variation of absorption. For the E region, the model, as proposed by Jones, is found to be unacceptable.

Conditions which are to be satisfied by an acceptable E region model are discussed.

3. An analysis of transient response of junction transistor amplifiers—J. C. Bhattacharyya, Jour. Inst. of Telecom. Engineers, Vol. 3, No. 4, pp. 297-308.

Abstract—An exact solution of the one-dimensional diffusion equation as is applicable to a junction type of transistor has been obtained by the method of Laplace's transform. The solution has been utilized to derive an expression for the short-circuited output collector current with a step input forcing function. The time-independent part of this expression is found to be identical with the relation for steady state collector current as given earlier by Shockley. Experimental results on the transient response of Philips OC70 junction transistor have been shown to agree closely with the response obtained theoretically. It is concluded that under ordinary condition of operation the major physical process underlying transistor action must be the diffusion of minority carrier across the base region.

4. Propagation of an electric pulse through a homogeneous and isotropic medium—Bimal Krishna Bhattacharyya, Geophysics, Vol. XXII, No. 4, October 1957, pp. 905-921.

Abstract—The paper discusses the propagation of a step-function pulse in a medium characterized by the three electric constant, permittivity, permeability and conductivity. The effect of the displacement current on the propagation is fully taken into account. Expressions of electric and magnetic fields are determined. It is shown that the time of travel of the pulse and the initial and final values of any one of the non-vanishing field components (all of which can be measured) fully specify the values of conductivity and permittivity of the medium.

5. Amplitude stabilized low frequency oscillator—A. K. Choudhury and B. R. Nag, Jour. Institution of Telecom. Engineers, Vol. 4, No. 1, pp. 36-45.

Abstract—The performance of a low frequency oscillator, stabilized with biased diodes or with lamps is described. The harmonic content in the output with different initial negative damping has been calculated and depicted in graphical form. Variation of the output amplitude with the variation of initial damping is also calculated.

A circuit arrangement for measuring the harmonic content in the output of the oscillator is also described.

6. The effect of a uniform magnetic field on electrodeless discharge in a tube and measurement of electronic mobility 1. Air—S. N. Goswami, Ind. Jour. Phys., Vol. XXXII, No., January, 1958, pp. 35-41.

Abstract—Results of measurements of the percentage increase in the breakdown potential in a discharge tube filled with dry air and excited with a 50-cycles alternating voltage, under a uniform magnetic field and of the electronic mobility have been reported. Measurements are made for different pressures and under magnetic fields inclined at different angles with the electric field. Results are discussed from the standpoint of the theory proposed by Deb and Goswami (1956).

7. An electronic differential analyser—A. K. Choudhury and B. R. Nag, Ind. Jour. Phys., Vol. XXXII, No. 2, February, 1958, pp. 91-108.

Abstract—An electronic differential analyser having sixteen operational amplifiers is described. The analyser is specially designed for solving equations arising in connection with research works on circuit theory, servomechanism and electron trajectories. The analyser works both repetitively and non-repetitively. Different sources of error of the computer elements are also discussed. Accuracy of the solutions obtainable by the machine is illustrated by some examples.

8. On linear delayed control systems. Part I—Considerations of stability—N. B. Chakrabarti, Ind. Jour. Phys., Vol. XXXII, No. 3, March, 1958, pp. 109-123.

Abstract—In this paper the problem of stability of delayed control systems has been studied. The location of the roots of some characteristic equations which can be considered as the sum of a rational function and a transcendental function has been discussed. Results are derived regarding stability of systems having the characteristic equation

$$(p^3 + ap^2 + bp + c)e^{\tau p} + rp^n = 0$$

It is shown that by the application of simple graphical methods, viz., the dual loci technique and the dual Nyquist diagram, the location of the roots can be rapidly determined and information regarding stability readily obtained.

9. Analogue multiplier and function generator with cathode ray tube—A. K. Choudhury and B. R. Nag, Ind. Jour. Phys., Vol. XXXII, No. 3, March, 1958, pp. 141-148.

Abstract: A multiplier and a function generator using a cathode ray tube with a capacitative pick up device are described. The device simplifies the construction of the multiplier and function generator without impairing the speed of response or the accuracy of the instrument.

10. Use of laguerre filters for realisation of time functions and delay—A. K. Choudhury and N. B. Chakrabarti, Ind. Jour. Phys., Vol. XXXII, No. 5, May, 1958, pp. 205-211.

Abstract—In this paper is presented a method of realising time functions, delays and delayed integrations by making use of Laguerre filters. Circuit arrangements for realising two classes of Laguerre functions are described. The method has the merit that the adjustments required for obtaining different operations present no difficulty.

11. The effect of a uniform magnetic field on electrodeless discharge in a tube and measurement of electronic mobility II. Oxygen, nitrogen, carbon dioxide and hydrogen—S. N. Goswami, Ind. Jour. Phys., Vol. XXXII, No. 5, May, 1958, pp. 241-249.

Abstract—Results of measurements of the percentage increase in the breakdown potential and of electronic mobility in a discharge tube filled with O₂, N₂, CO₂ and H₂, and excited with a 50-cycles alternating voltage, under a uniform magnetic field have been reported. Measurements are made at different pressures and under magnetic fields inclined at different angles with the electric field.

12. On the application of an electronic differential analyser for finding the roots of a polynomial—B. R. Nag, Ind. Jour. Phys., Vol. XXXII, No. 5, May, 1958, pp. 212-217.

Abstract—A method of finding the roots of a polynomial with real coefficients by an electronic differential analyser is described. The principle underlying the method is to set up in the analyser a system having a transfer function, of which the numerator is the polynomial whose roots are to be obtained. The denominator of the transfer function is a suitably chosen polynomial. Roots of the polynomial are then obtained by determining the frequencies at which the system gives zero output.

DEPARTMENT OF AGRICULTURE

1. Studies in Agricultural Economics : II. On the development of agriculture and village economy based on the Survey of typical village of West Bengal.—P. K. Sen (*Ind. Agriculturist*, Vol. I, Part II, 1957).

2. **Abstract**—Information gathered from an exhaustive survey of a typical West Bengal village is presented.

It becomes evident that the poverty of village economy can be resolved and sufficient capital formation for industrial development of the country can be achieved by developing agriculture on well known agronomic standards making fuller use of the existing lands and man power.

The necessary initial capital can be made available even with the grain raised at the present rate of production and the required enterprise may be created by appropriate land reform to provide economic sizes of holdings.

2. Th. Problem of Prices—P. K. Sen. (*Indian Agriculturist*, Vol. II, Part I, 1958).

Abstract—Factors contributing to the problem of agricultural prices are discussed. It is suggested that the problem is basically social.

3. Interaction of growth regulating substances and vitamin, amino acid and reducing and non-reducing sugars on root formation in *Justicia* (*Justicia gendarussa* Linn F.) and mulberry (*Morus indica* Linn).—P. K. Sen (*Symposium on Modern Advances in Plant Physiology*, Allahabad University, January, 1958).

Abstract—*Justicia* and mulberry show difference in their rooting behaviour. The former records a significant increase with IAA, IBA and NAA, but the latter shows an increasing effect only with IBA. *Justicia* shows very little beneficial effect with glucose and glutamic acid but with sucrose it shows a significant increasing effect. Mulberry shows no effect with sucrose but it shows significant increase with glutamic acid and glucose when supplied with IAA.

4. On the inheritance of photoperiodic reaction of rice.—P. K. Sen, (*Nature*, Vol. 182, 1958).

Abstract—The F_1 plants, resulting from crosses between period bound, photo-indifferent Aus varieties and season bound, photo sensitive Aman varieties of rice show an intermediate effect of photoperiodic reaction.

In respect of growth characters the F_1 plants indicate an expression of hybrid vigour.

5. Peduncular branching in the spadix of *Dieffenbachia picta* Scott. (Fam. Araceae).—R. M. Datta. (*Science and Culture* 23, 375-76, 1958).

Abstract—This is a new record showing phylogenetic relationship with the family Palmae in system of classification.

6. Comparative studies on the genesis of sperms in the pollen tubes of two cultivated jute species.—R. M. Datta. (*La. Cellule* LVIII(3) 289-303, 1957).

Abstract—It has been observed that the tube nucleus generally precedes the generative cell, sometimes follows the latter. It contains a nucleolus with a vacuole within. The generative nucleus.

Contains a nucleolus. Nuclear area is not discernible in the stained preparations in prophasic stages. It contains chromatin matters of different shape and size. They are noticed with form of chains, globules, streaks, etc. Sometimes parallel threads, long or short, are also observed. They are

Tenlgem positive and are regarded as excess of heterochromatin connecting homologous euchromatic regions. Chromosomes divide equationally and extra chromosomes and heterochromatin are thrown out in the cytoplasm in course of division. Clear spindle is formed. Cytokinesis takes place by furrowing. More than two sperms are sometimes noticed.

7. Pollen grain studies in various types of *Cochrorus olitorius*, L. C. *Capsularis* L. and some other species of *Cochrorus*.—R. M. Datta. (*Grana Palynologica*, Vol. 1(3), 18-24, 1958).

Abstract—Fertility percentage of pollengrains in 31 types of *C. capsularis*, Eight types of *C. olitorius* and six other different species of *Cochrorus* has been worked out. Measurements of the pollengrains of three types of *C. olitorius* ten types of *C. capsularis* and five other species not yet reported before are given.

After performing the test of significance by analysis of variance, it is noticed that there exists real variation among the species studied. Intergradations are noticed showing evolution of the genes to be of divergent type though in one direction, as shown by similar type of pollen morphology.

Meiotic liability in different *Cochrorus* species very likely reflects on the grain size.

8. The relation of auxin to Moral Initiation and extension growth in Winter Rye.—T. M. Das. (*Indian Agriculturist*, Vol. 2, 14-27, 1958).

Abstract—A new method of auxin assay has been described. Auxin content of the apex, growing ear and stem in relation to vernalization and day length has been studied. The change of auxin content in nodes and internodes during extension growth also determined.

9. Growth of Mesocotyl in Rice Embryos.—T. M. Das, (*Science and Culture*, Vol. 23, 149, 1957).

Abstract—Growth of Mesocotyl, coleoptile and root of rice embryos under different photoperiods has been studied. Effect of different spectrums and oxygen tension on growth also has been analysed.

10. Variations in the chromosome number of *C. sidoides*. F. Muell.—S. J. Basak.—(*Cm. Sci.*, March, Vol. 27, 101, 1958.)

Sri Gopal Halder.

Committee to consider the question of implementing the scheme drawn up for running of the Calcutta Review :—

The Treasurer.
The Director of Public Instruction, West Bengal.
Sri P. K. Bose.
Sri Mohitkumar Maitra.

Committee to consider the Proceedings of Standing Committee of the Inter-University Board :—

The Vice-Chancellor.
Prof. S. P. Chatterjee.
Sri P. K. Bose.

* Committee to consider the question of getting a suitable memorial of the late Dr. Harendra Coomar Mookerjee :—

The Vice-Chancellor.
The Treasurer.
Sri Hemendraprasad Ghosh.
Prof. P. N. Banerjee.
Sri R. P. Mookerjee.
Sri C. K. Bhattacharyya.
The Registrar (Secretary).

* Selection Committee for appointment to the Taraprasad Khaitan Lectureship for the year 1957 :—

The Vice-Chancellor.
Prof. P. B. Sarkar.
Prof. N. R. Ray.
Sri K. P. Khaitan.

Selection Committee for appointment to the Kamala Lectureship for the year 1957 :—

Prof. N. Datta.
Prof. K. P. Chattopadhyay.
Sri S. Banerjee.
Dr. S. K. De.
Sri Ramaprasad Mookerjee.

* Selection Committee for appointment to the Adharchandra Mookerjee Lectureship in Science for the year 1957 :—

The Vice-Chancellor.
The Vice-President, University College of Science.
Prof. N. R. Sen.
Prof. P. B. Sarkar.

* Selection Committee for appointment to the Girischandra Ghosh Lectureship for the year 1957 :—

The Vice-Chancellor.
Prof. S. C. Sengupta.
Sri Sailendranath Mitra.
Prof. Sukumar Sen.
Sri Narendra Dev.

* Selection Committee for the award of the Sir Devaprasad Sarbadhikari Gold Medal for the year 1957 :—

The Vice-Chancellor.
Prof. P. N. Banerjee.
Prof. N. R. Sen.
Prof. P. B. Sarkar.
Dr. S. K. Chakravorty.
Sri A. C. Ukil.

* Selection Committee for appointment to the Ramananda Lectureship for the year 1957 :—

The Vice-Chancellor.
The Vice-President, University College of Arts.
The University Professor of Economics.
Prof. Nihar Ranjan Ray.
Sri Manindranarayan Ray.
Editor of the Modern Review.
Dr. Kalidas Nag.

* Board of Management for the award of Bipradas Palchaudhuri Fellowship for the year 1958 :—

The Vice-Chancellor.
The Vice-President, University College of Arts.
Prof. J. N. Banerjee.
Dr. Kalidas Nag.
Sri Ranajit Palchaudhuri.
Dr. P. C. Lahiri.
Prof. S. B. Dasgupta.

* Board of Adjudicators for the award of the Zainul Abedin Gold Medal for the year 1957 :—

The Head of the Department of Arabic and Persian, Calcutta University.

Aga Mirza Mohoshin Namazie.

Maulana Syed Ahmed Akbarabadi.

Mr. K. Dowlatshabi.

Sri Abdul Quadir.

Sri Hirall Chopra.

* Committee to consider the explanation submitted by Sri Lalmohan Bose, an Assistant in the Accounts and Audit Department.

Prof. P. N. Banerjee.

Sri S. N. Modak.

Committee to deal with the matter regarding purchase of Land at 51/2, Hazra Road :—

The Vice-Chancellor.

The Treasurer.
